

AOASO Survey 2024

Which country dose your society/association represent?

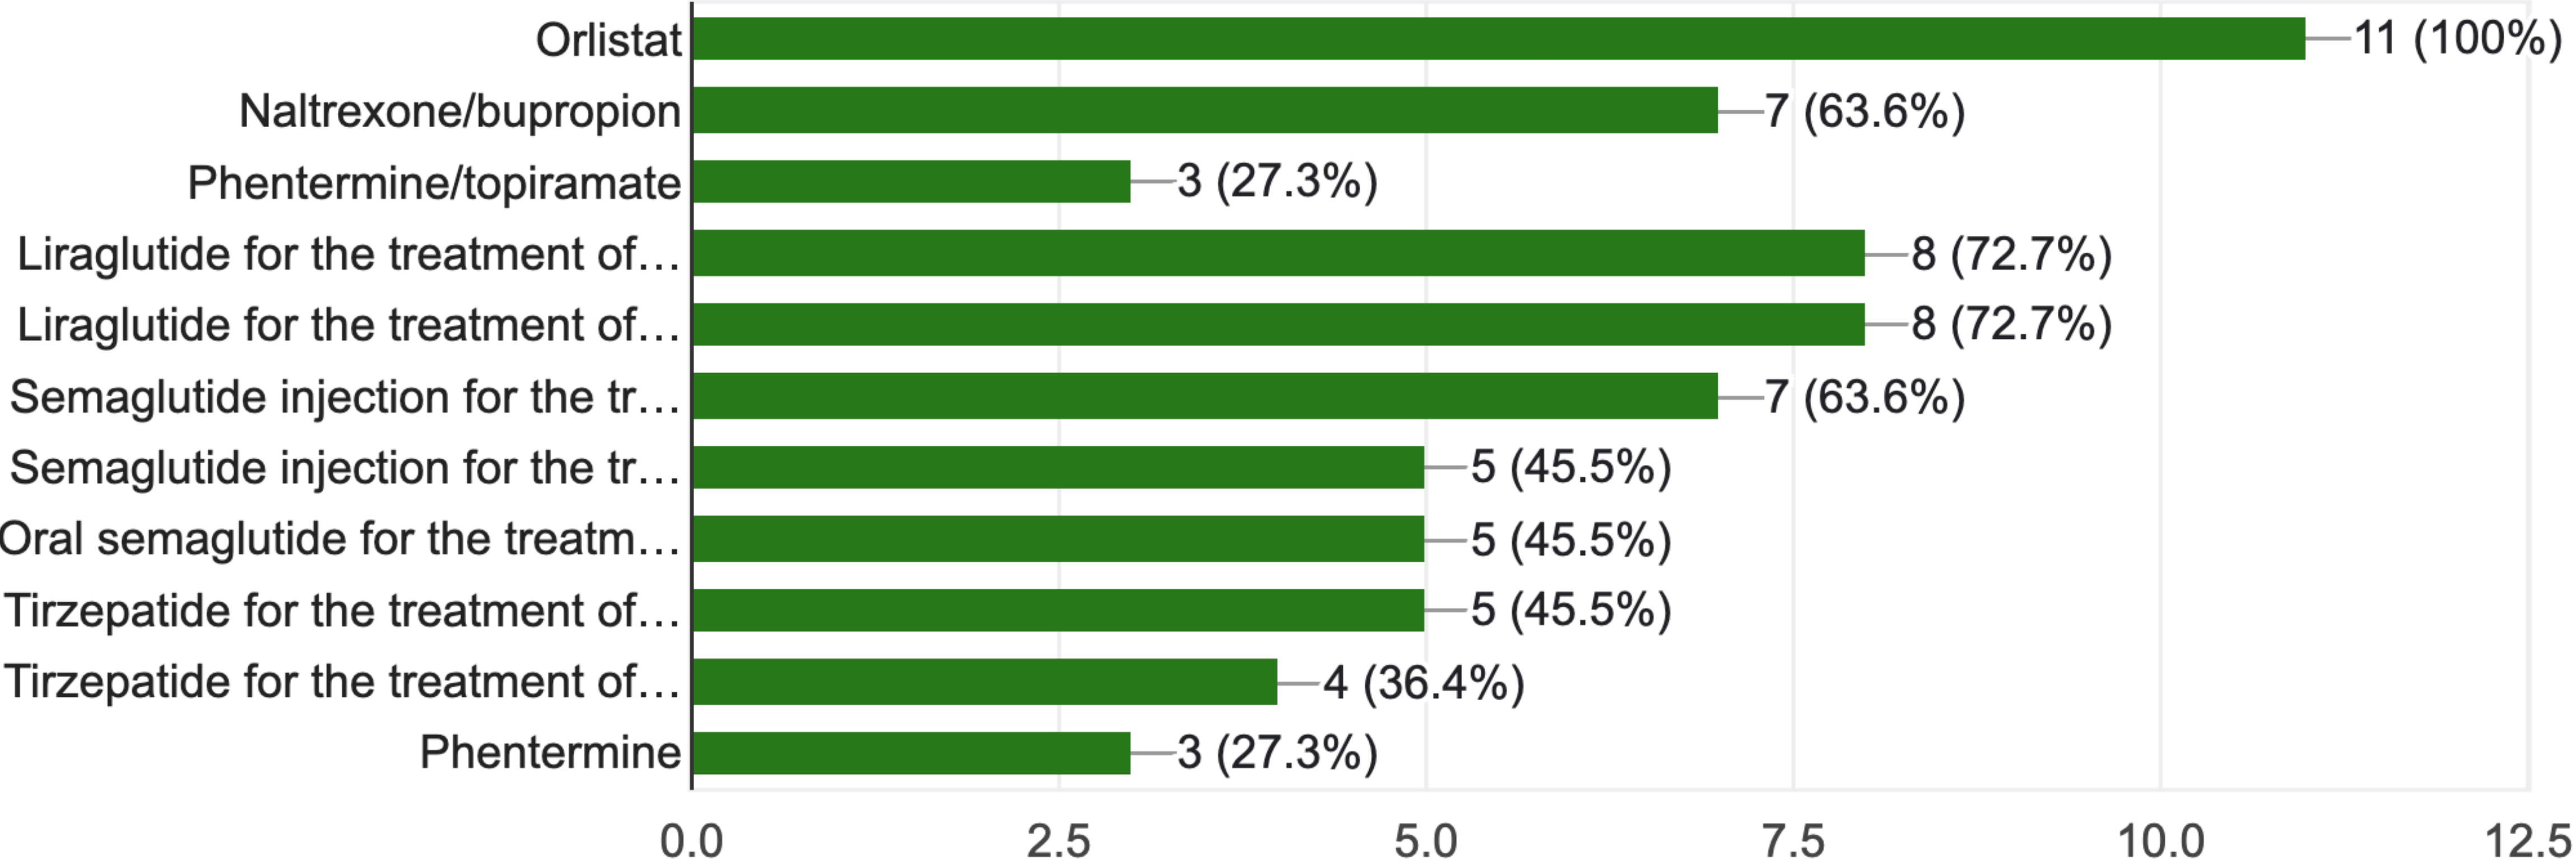

11 responses

Available AOMs

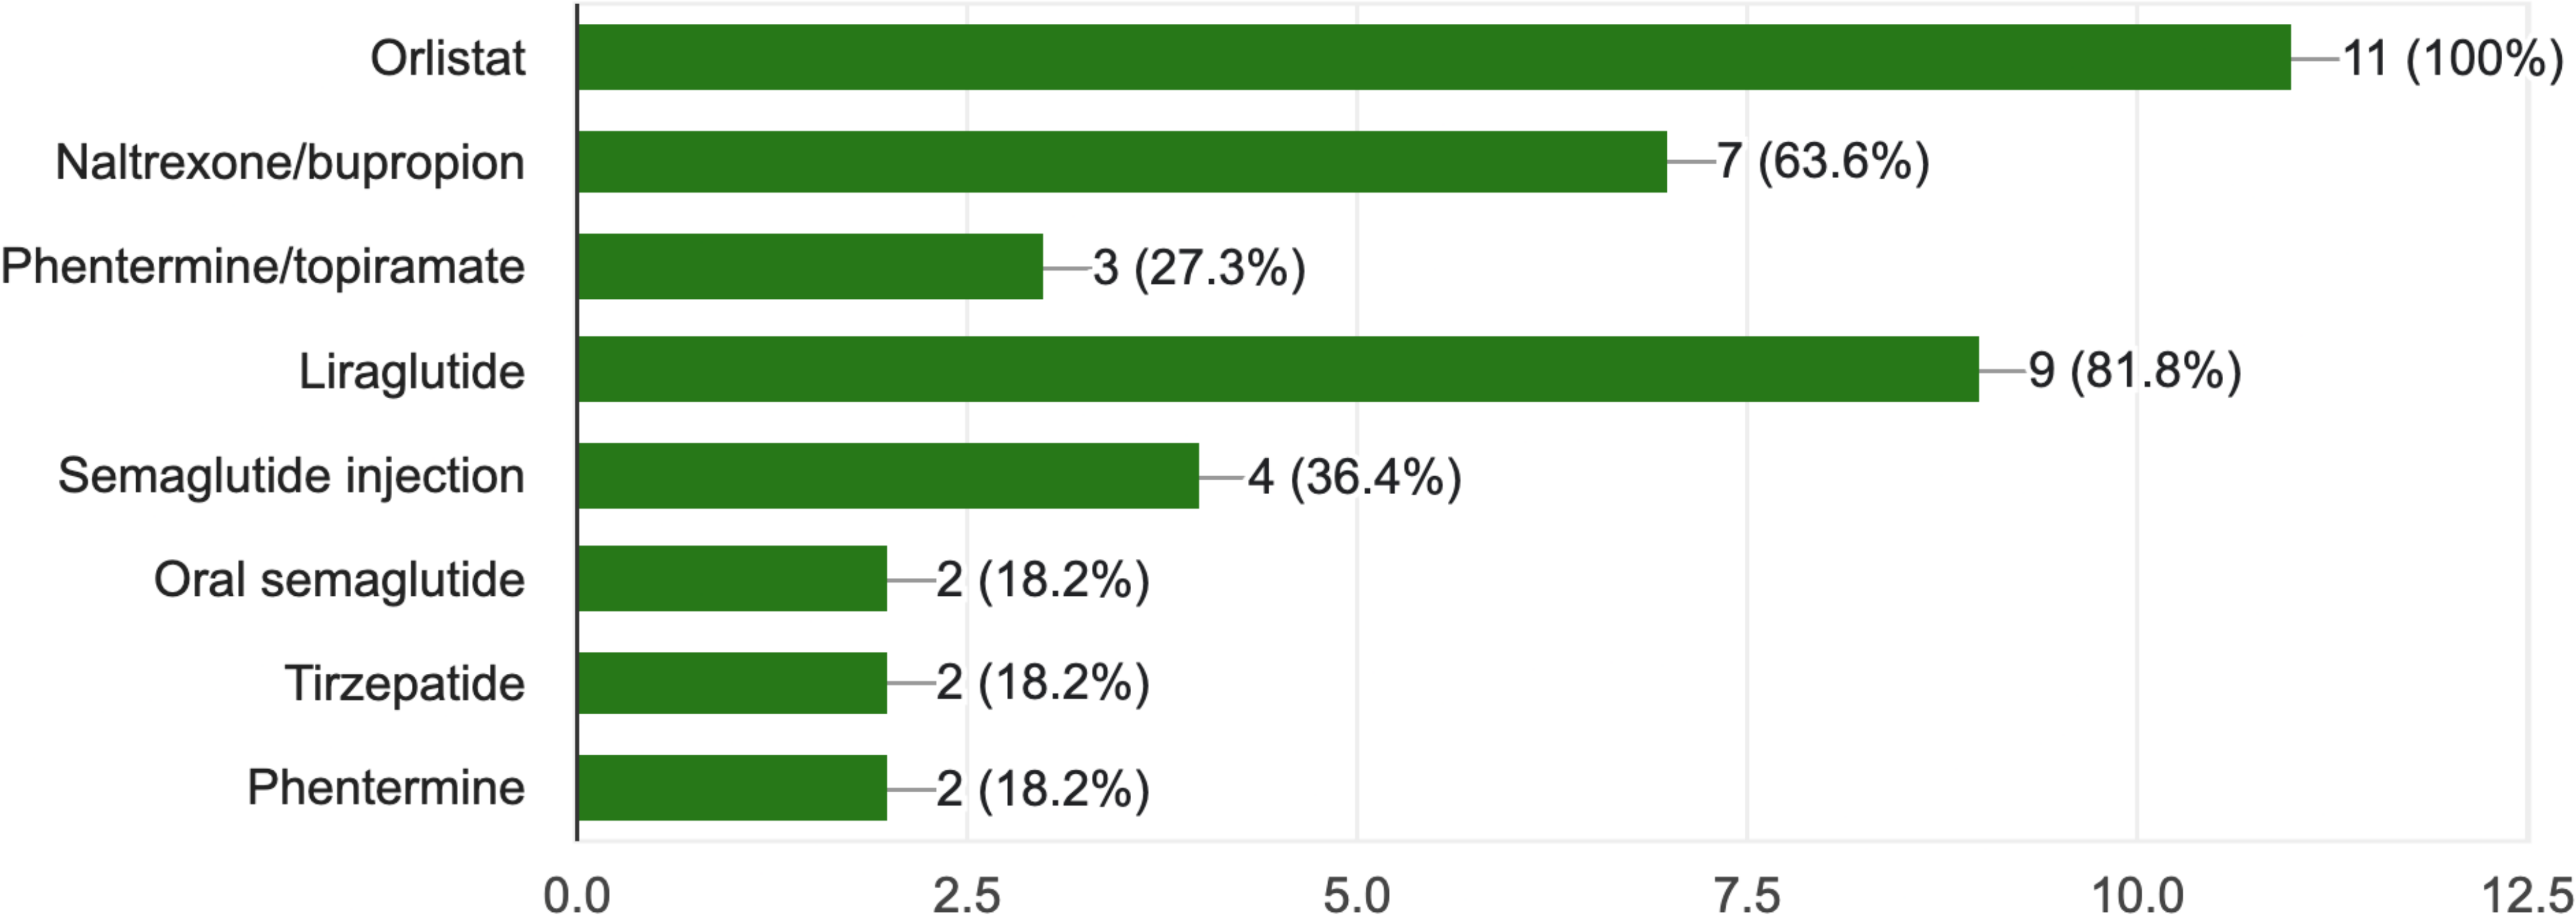

Which long-term AOMs have been approved in your country?

11 responses

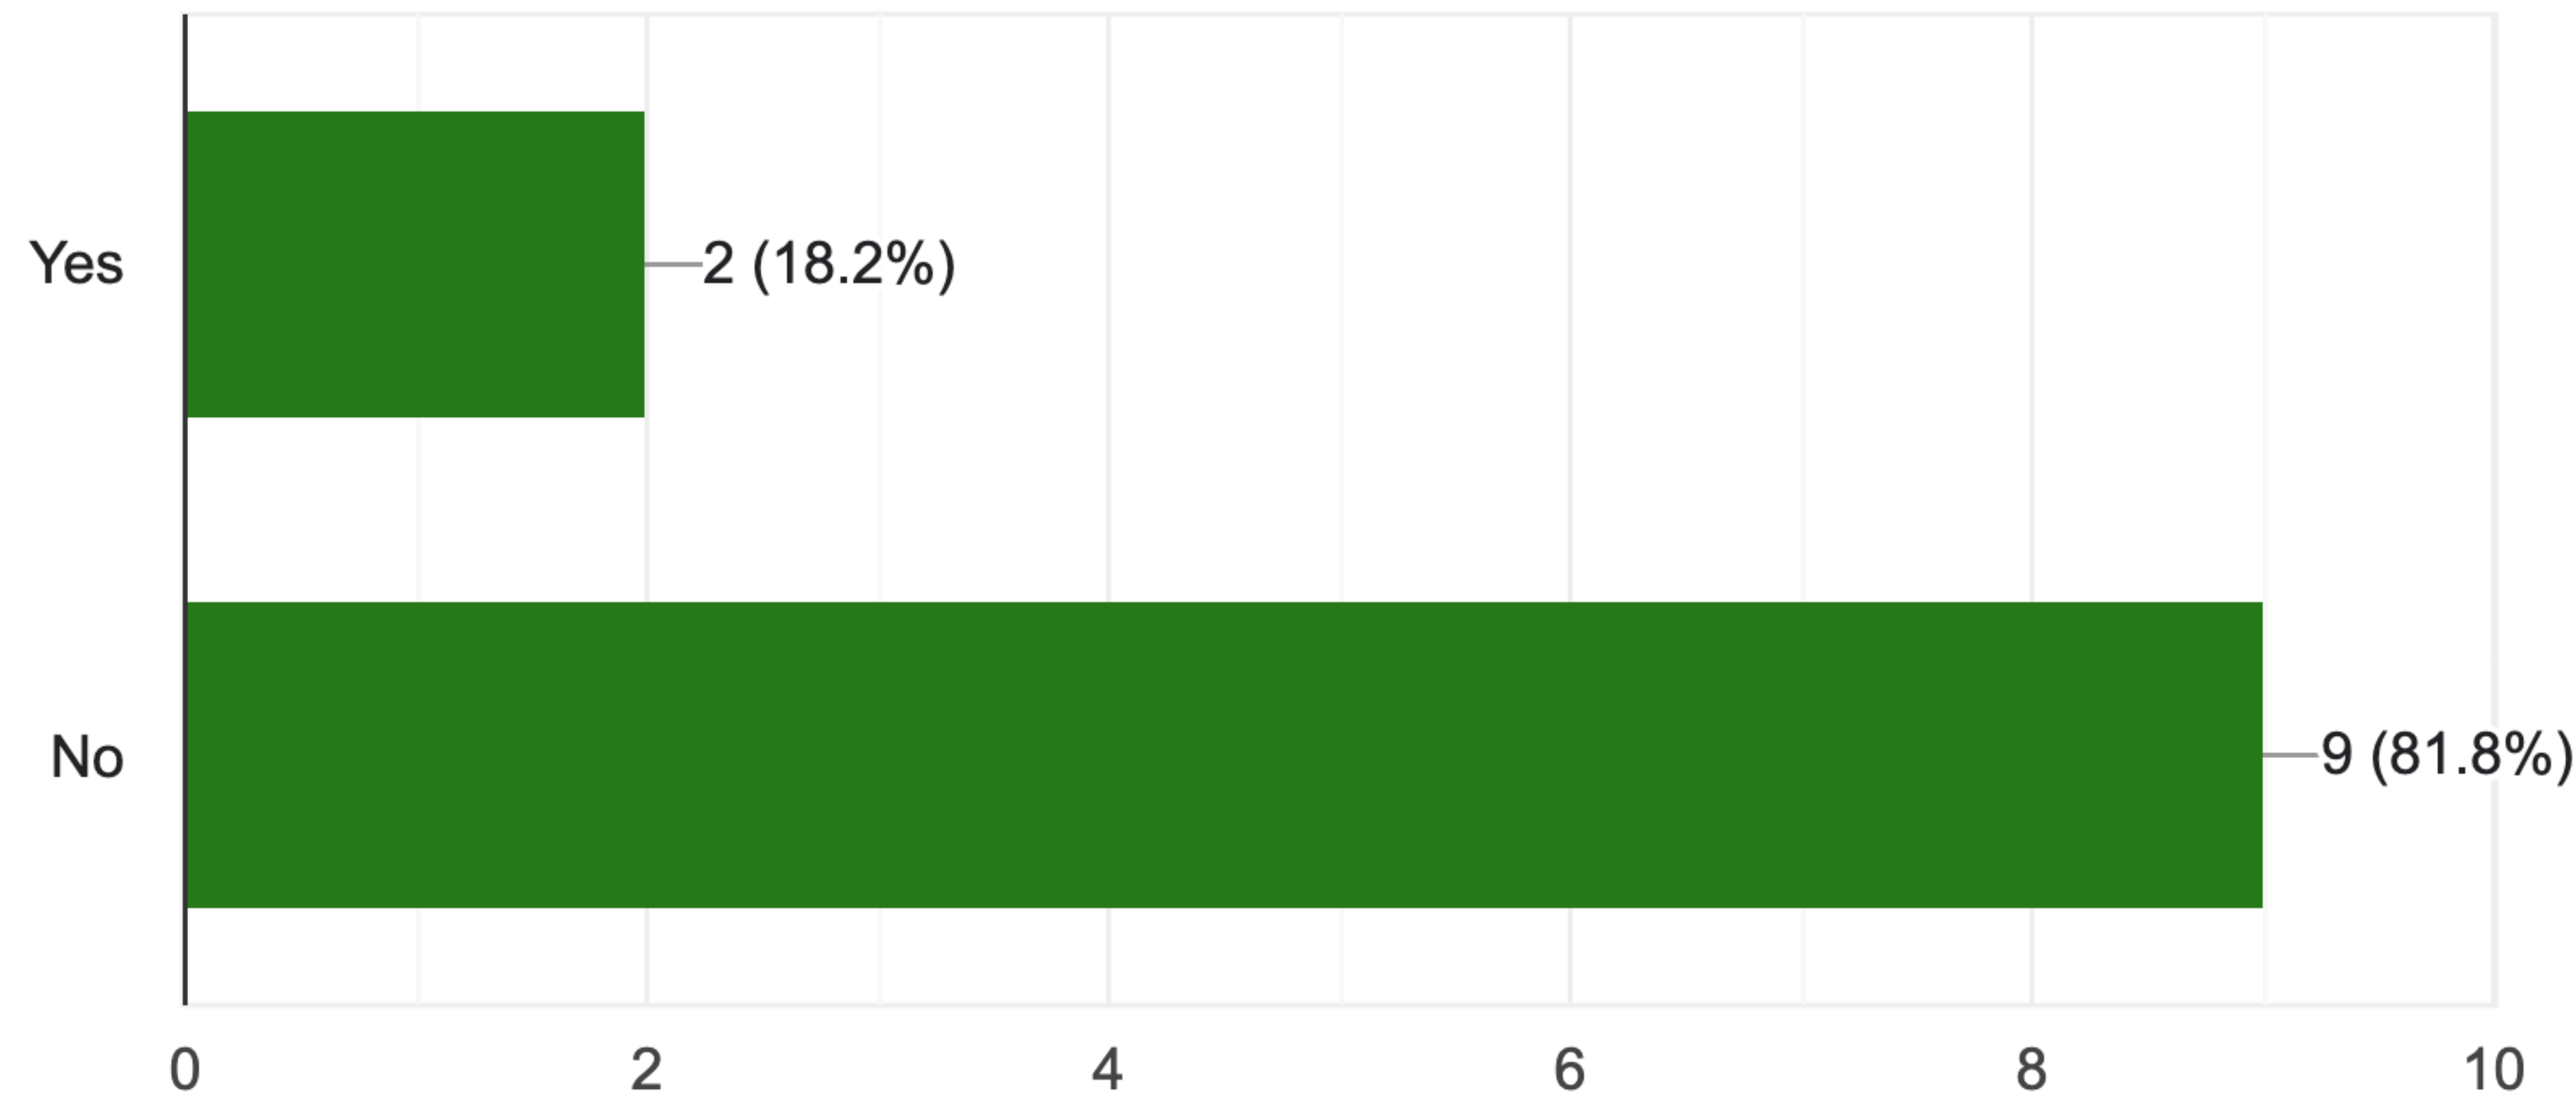

Which long-term AOMs are currently available and being supplied in your country?

11 responses

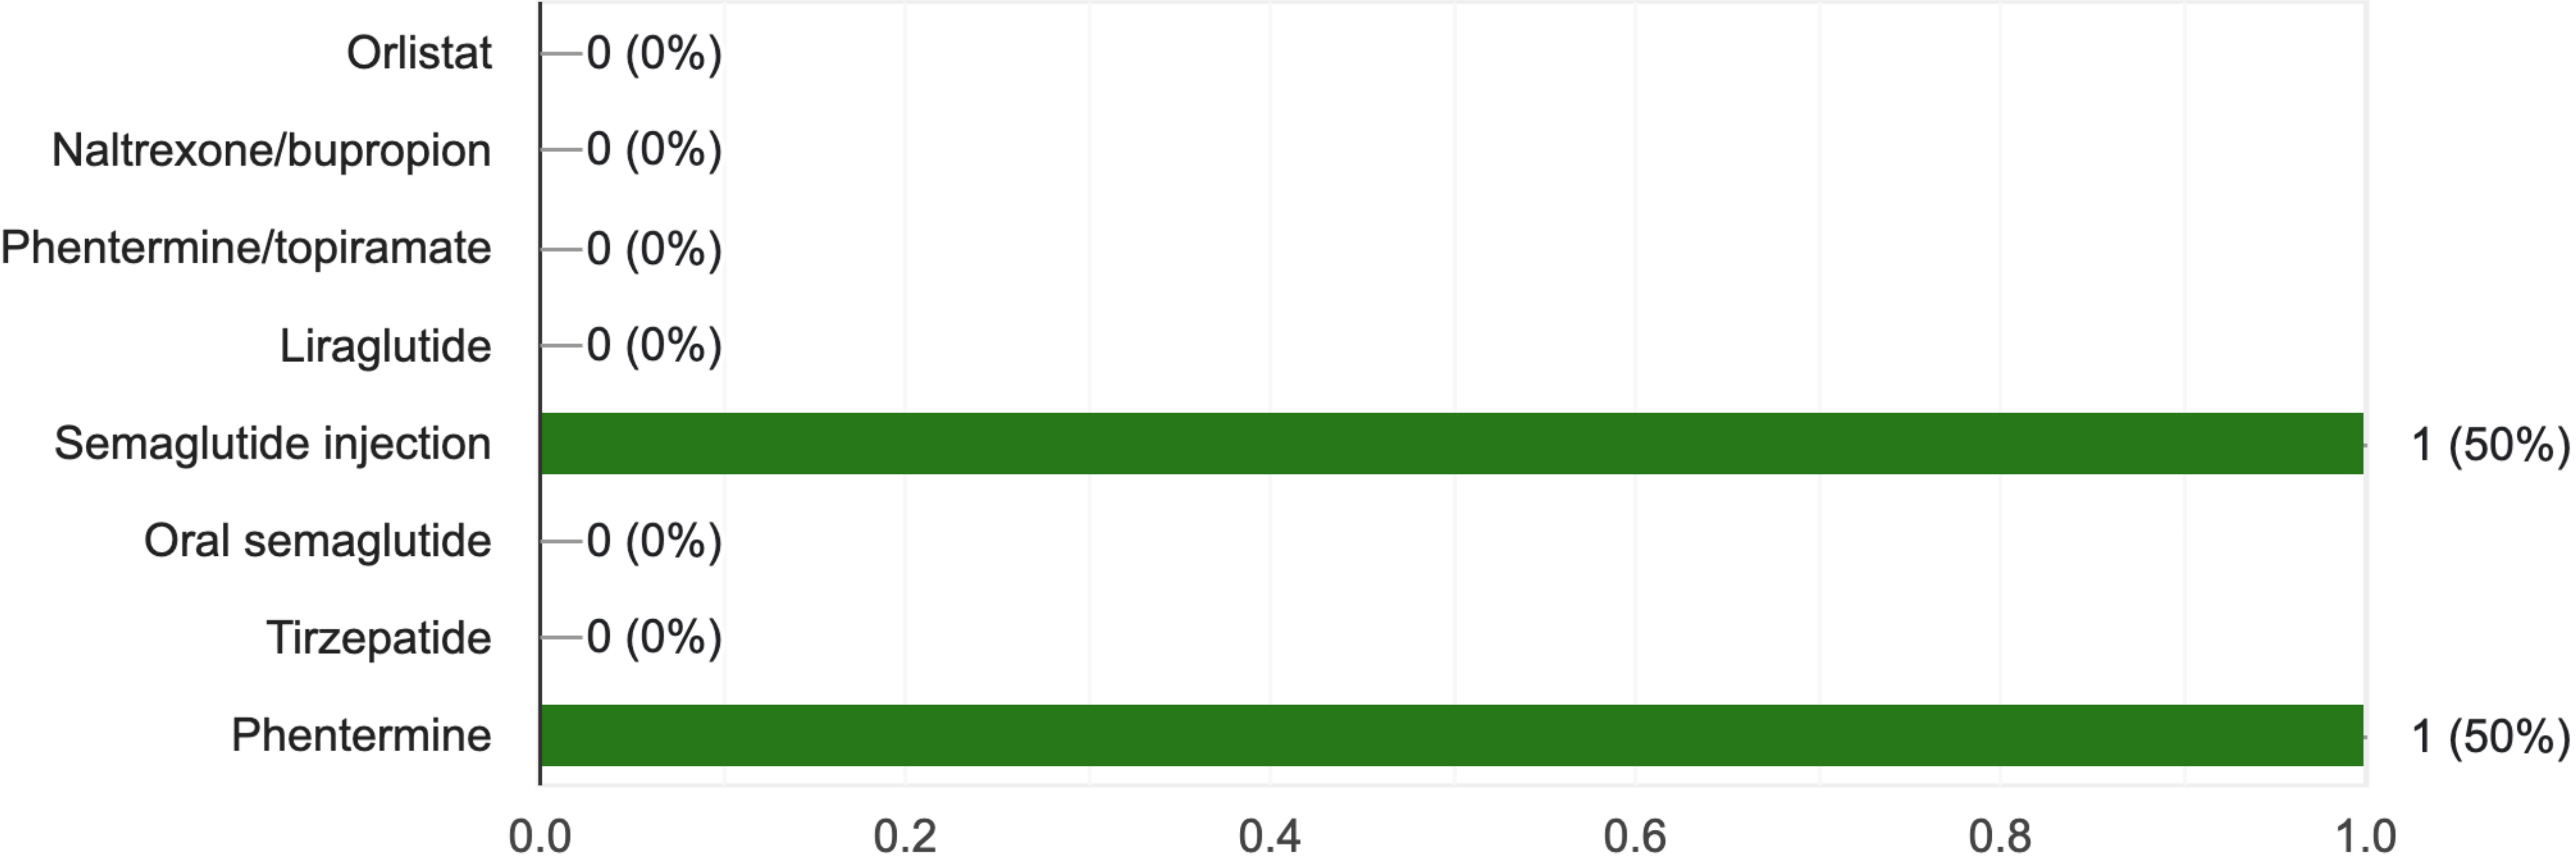

Is there any reimbursement available for obesity pharmacotherapy in your country?

11 responses

If so, please indicate all AOMs that can be reimbursed.

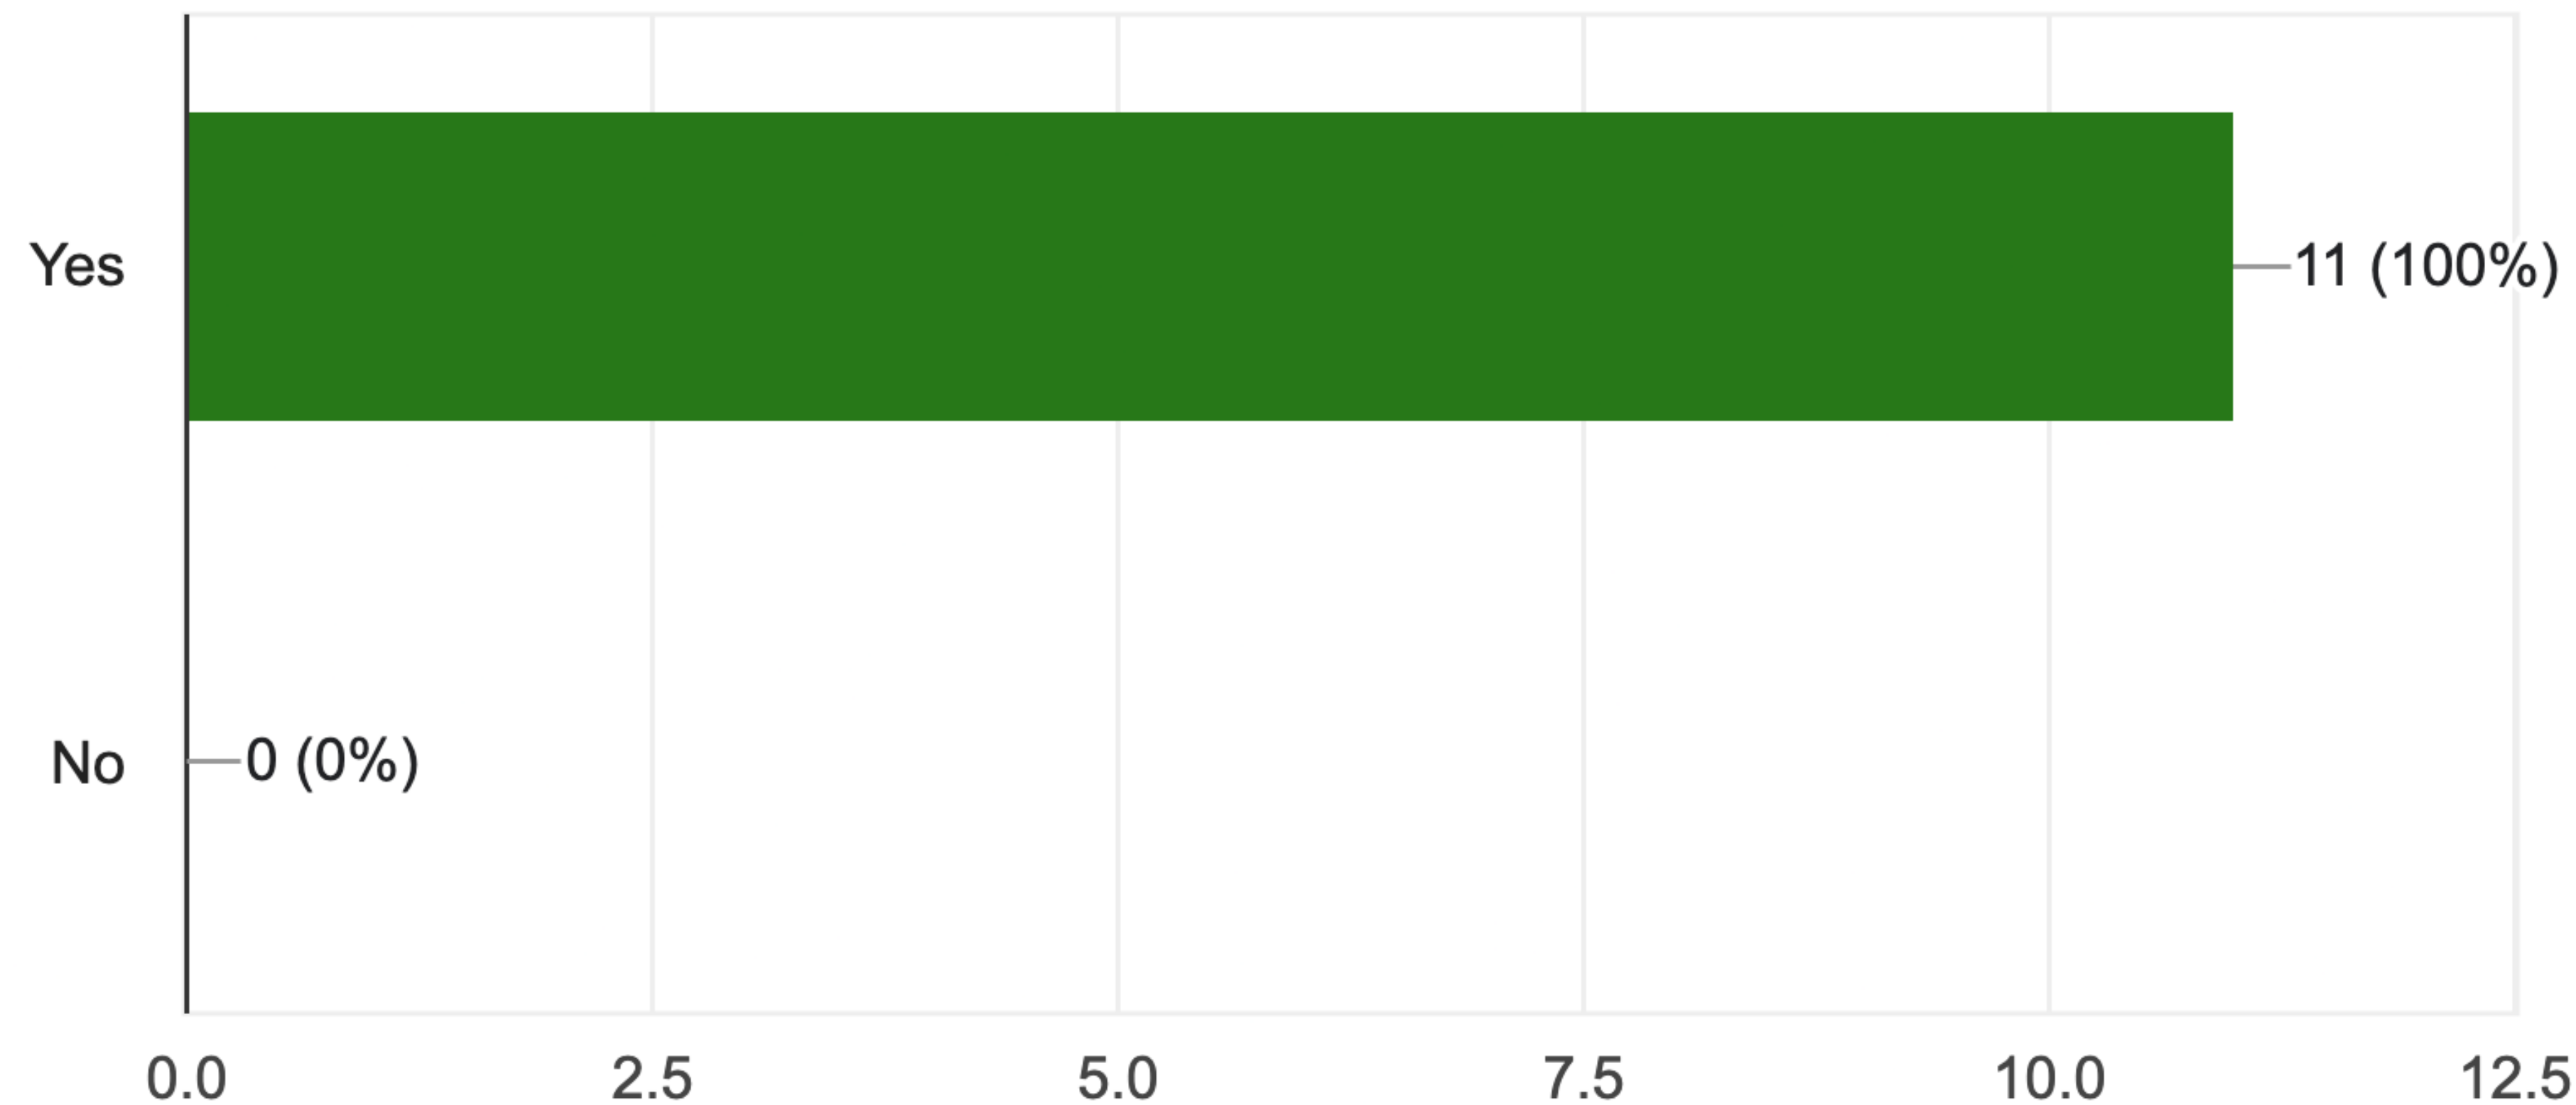

2 responses

Orlistat

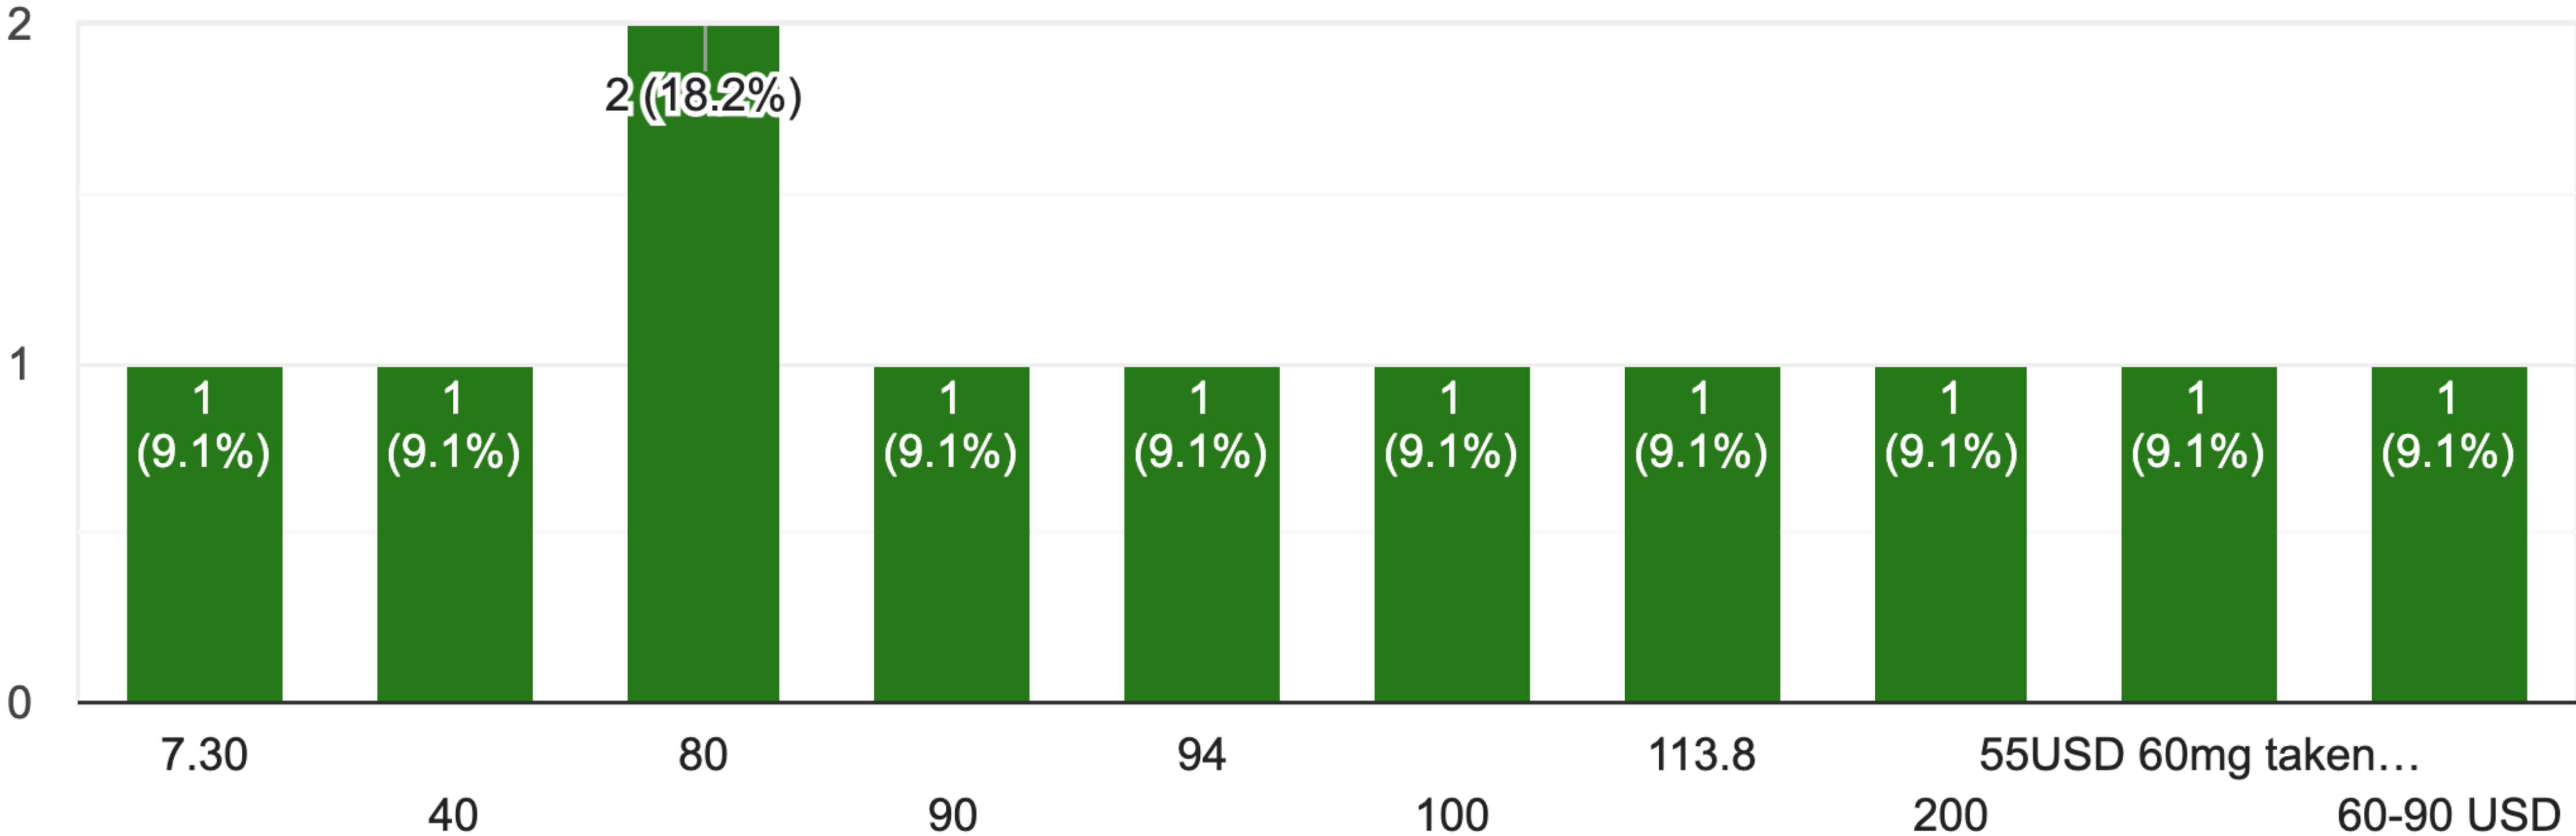

Is the supply of orlistat stable in your country?

11 responses

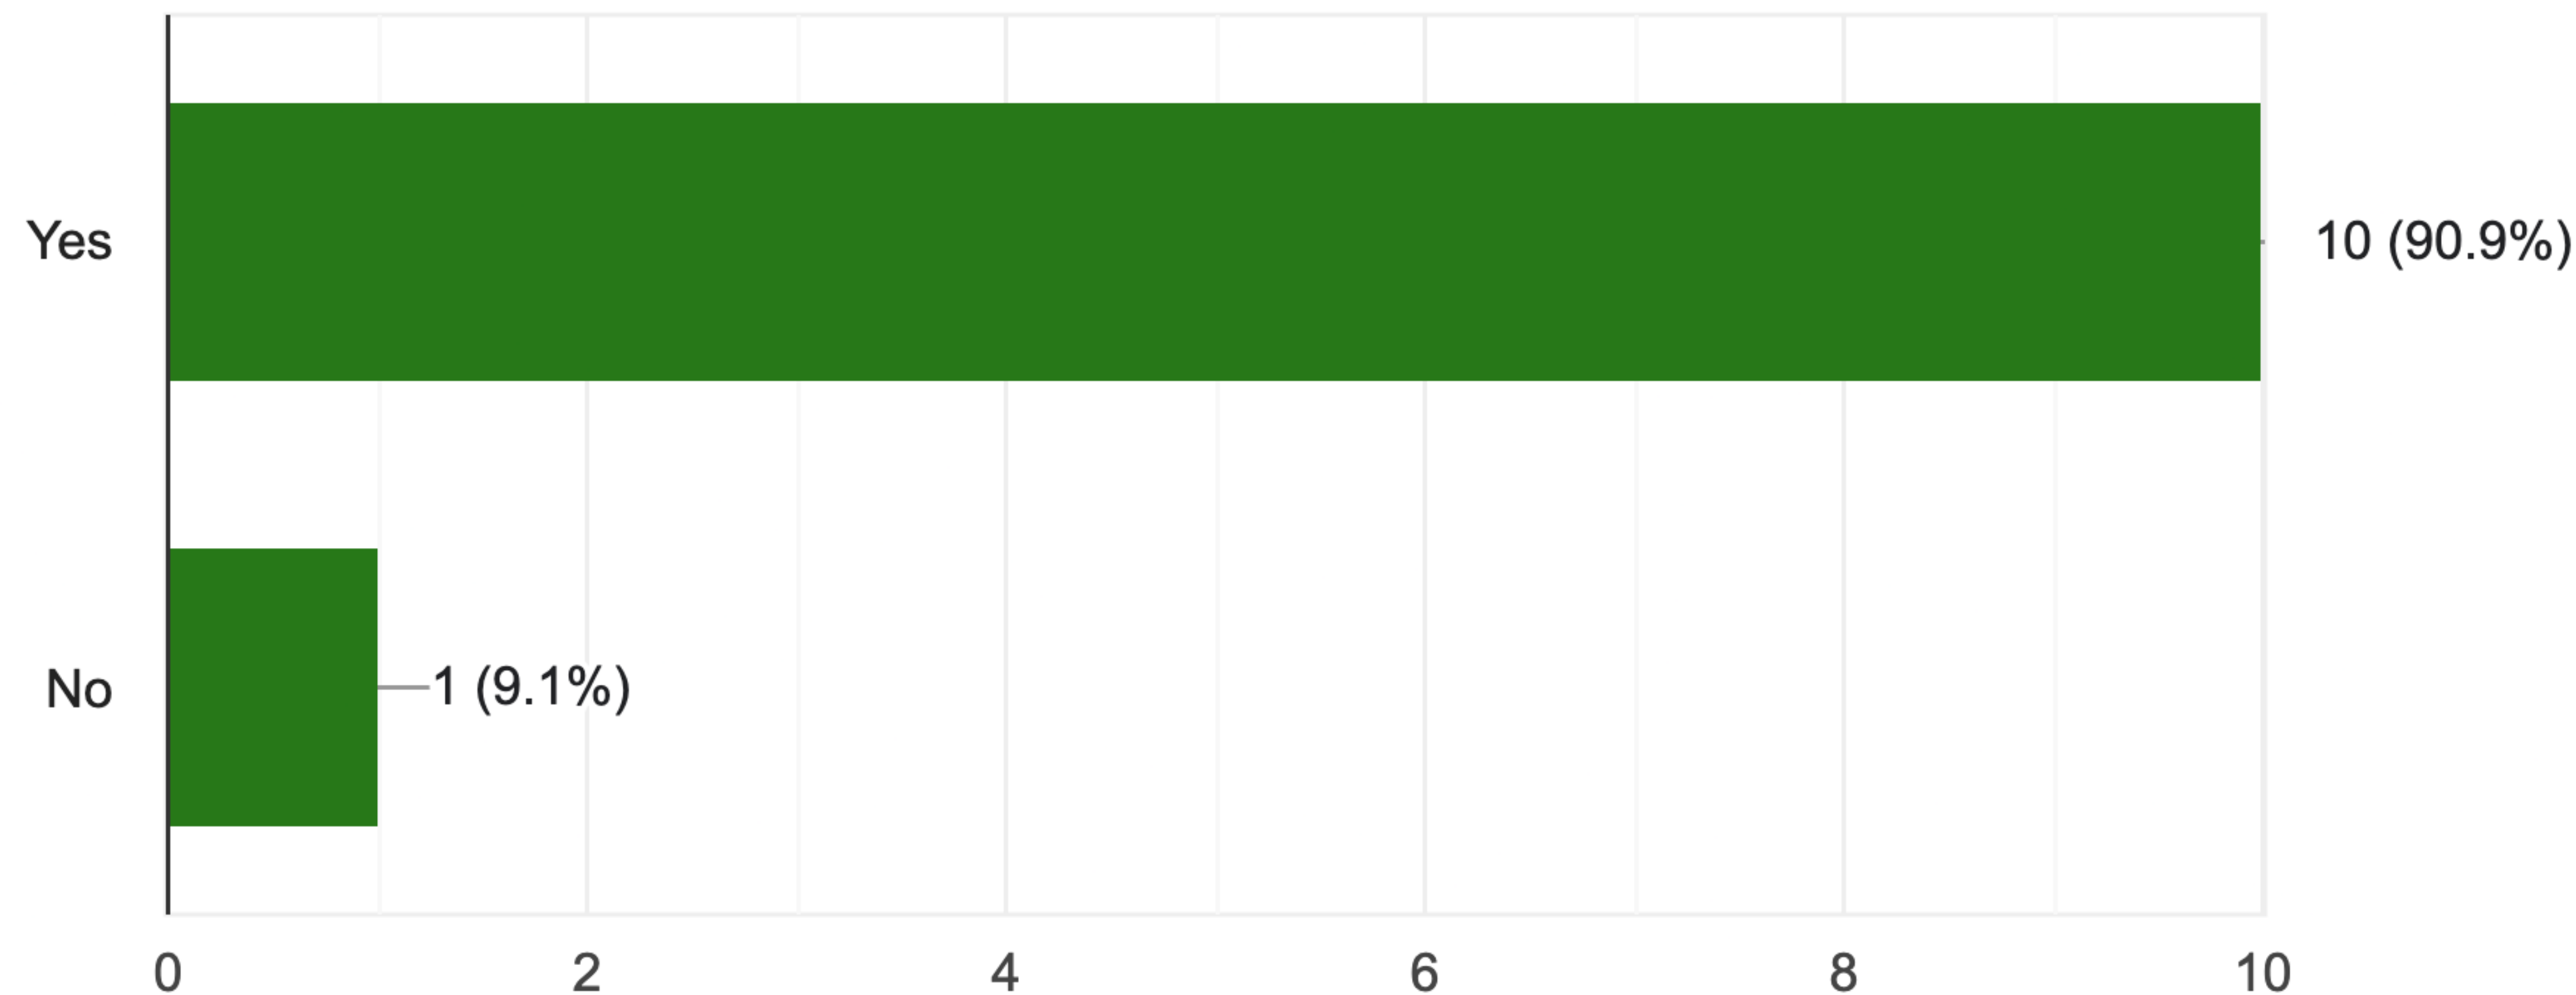

What is the usual cost of orlistat 120 mg taken three times a day for 28 days in USD?

11 responses

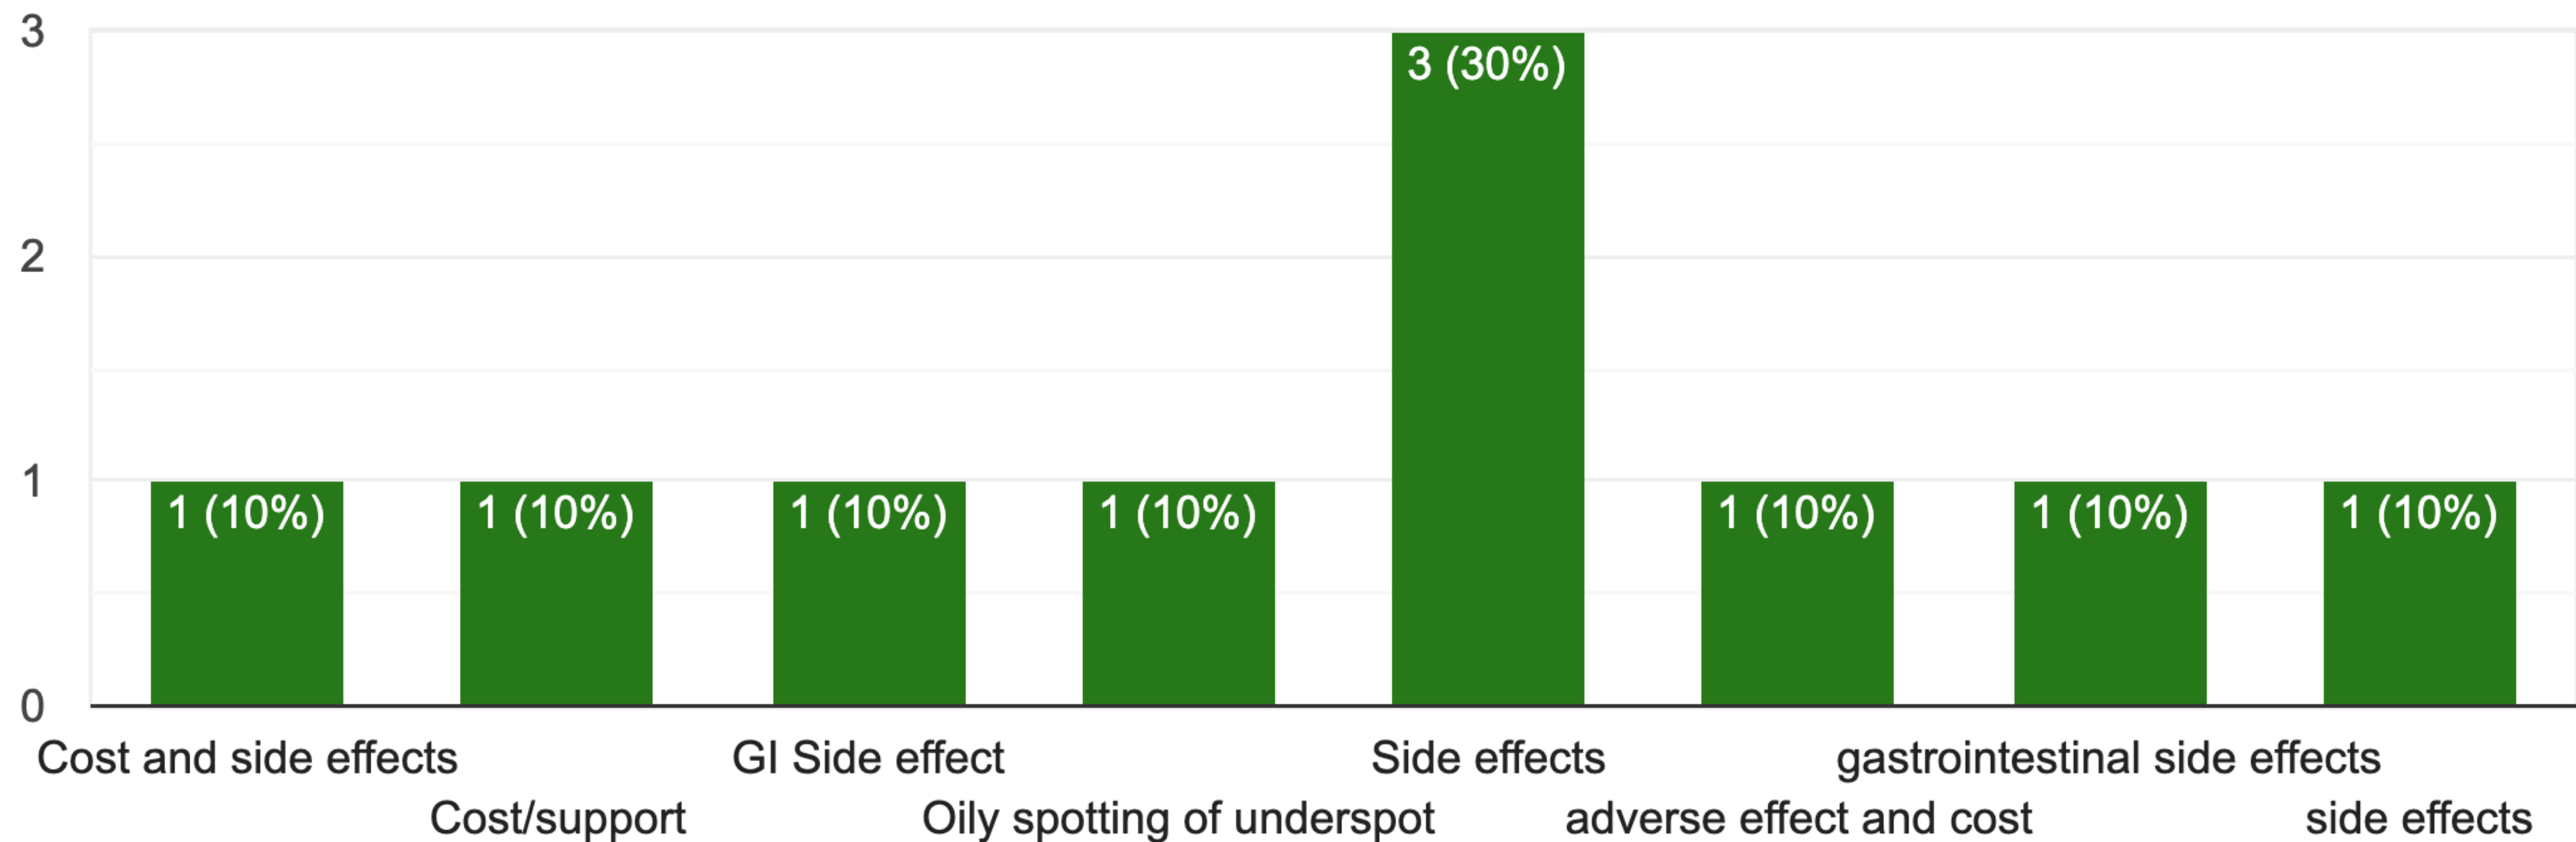

Do you think that people with obesity feel barriers to using orlistat for their treatment?

11 responses

If so, what are the barriers?

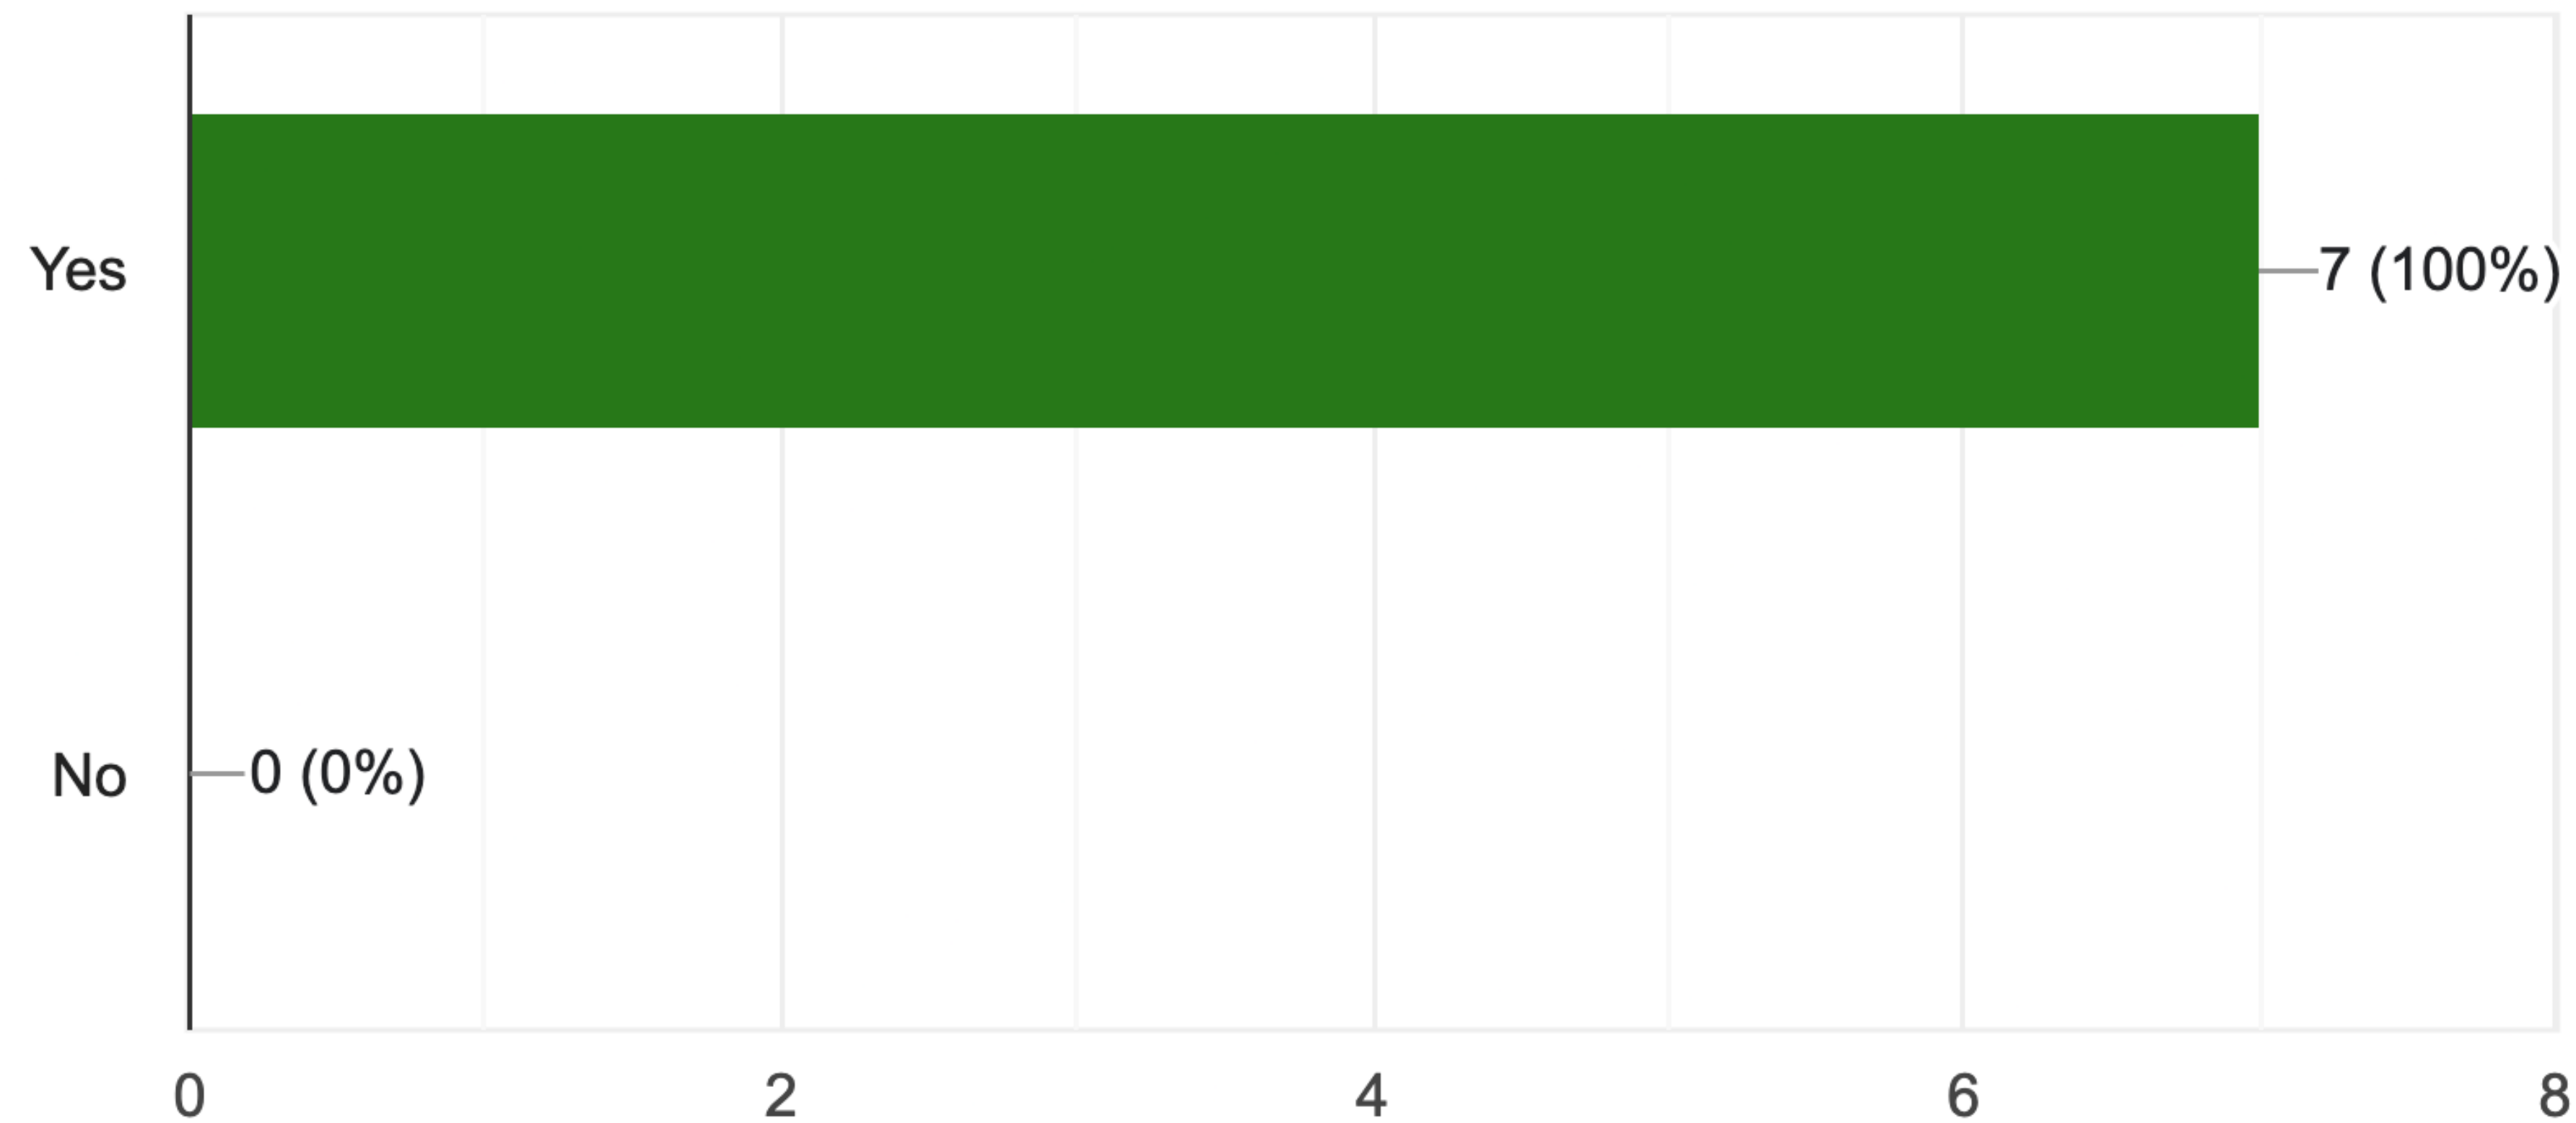

10 responses

Naltrexone/bupropion

Is the supply of naltrexone/bupropion stable in your country?

7 responses

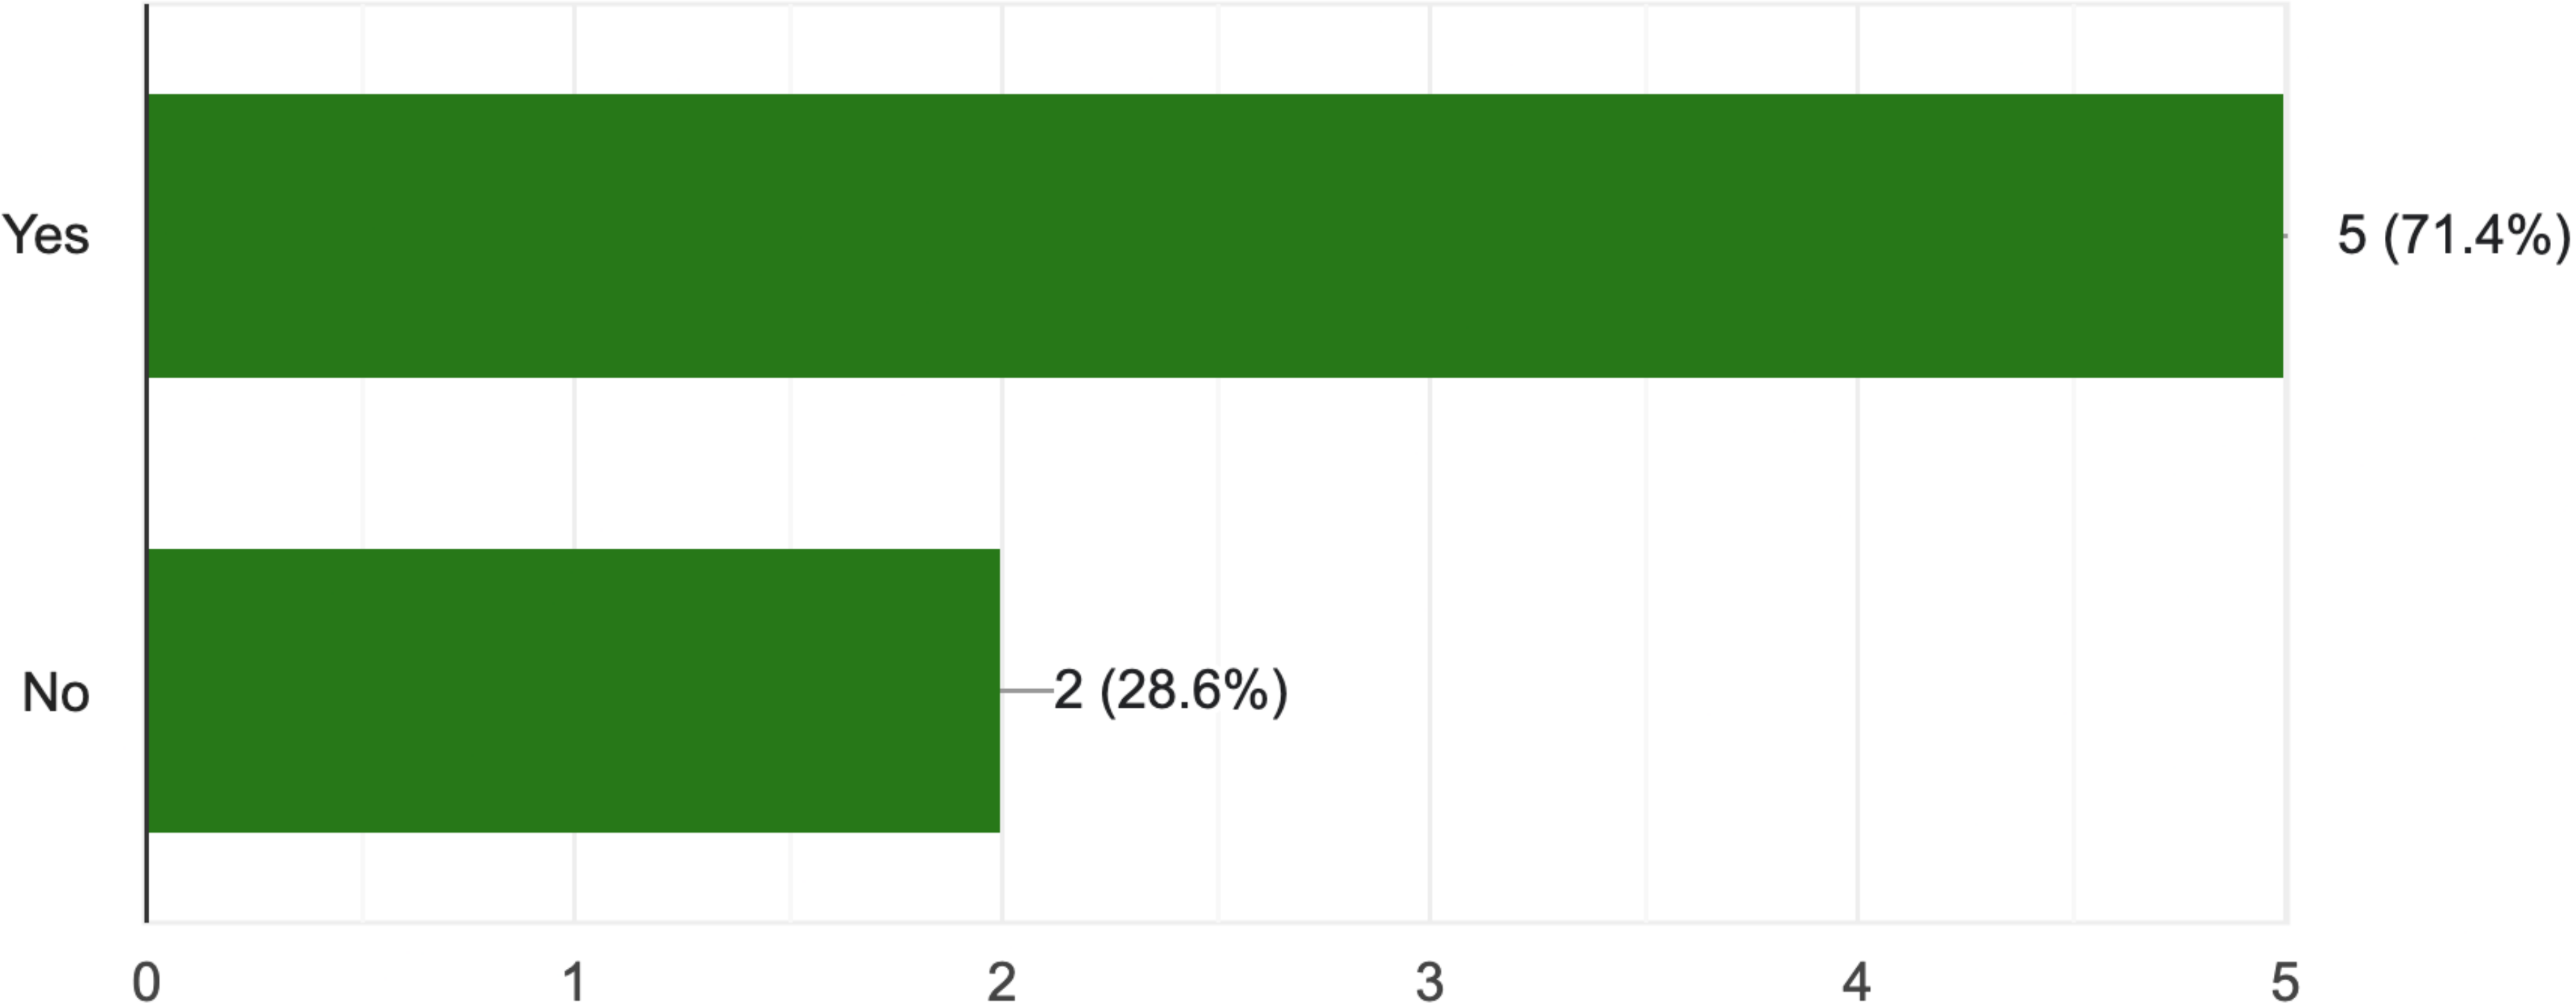

What is the usual cost of naltrexone/bupropion 32/360 mg (two 8/90 mg tablets taken twice a day) for 28 days in USD?

7 responses

- 170
- 600
- 60
- 122.00
- 150
- 100
- 122

Do you think that people with obesity feel barriers to using naltrexone/bupropion for their treatment?

7 responses

If so, what are the barriers?

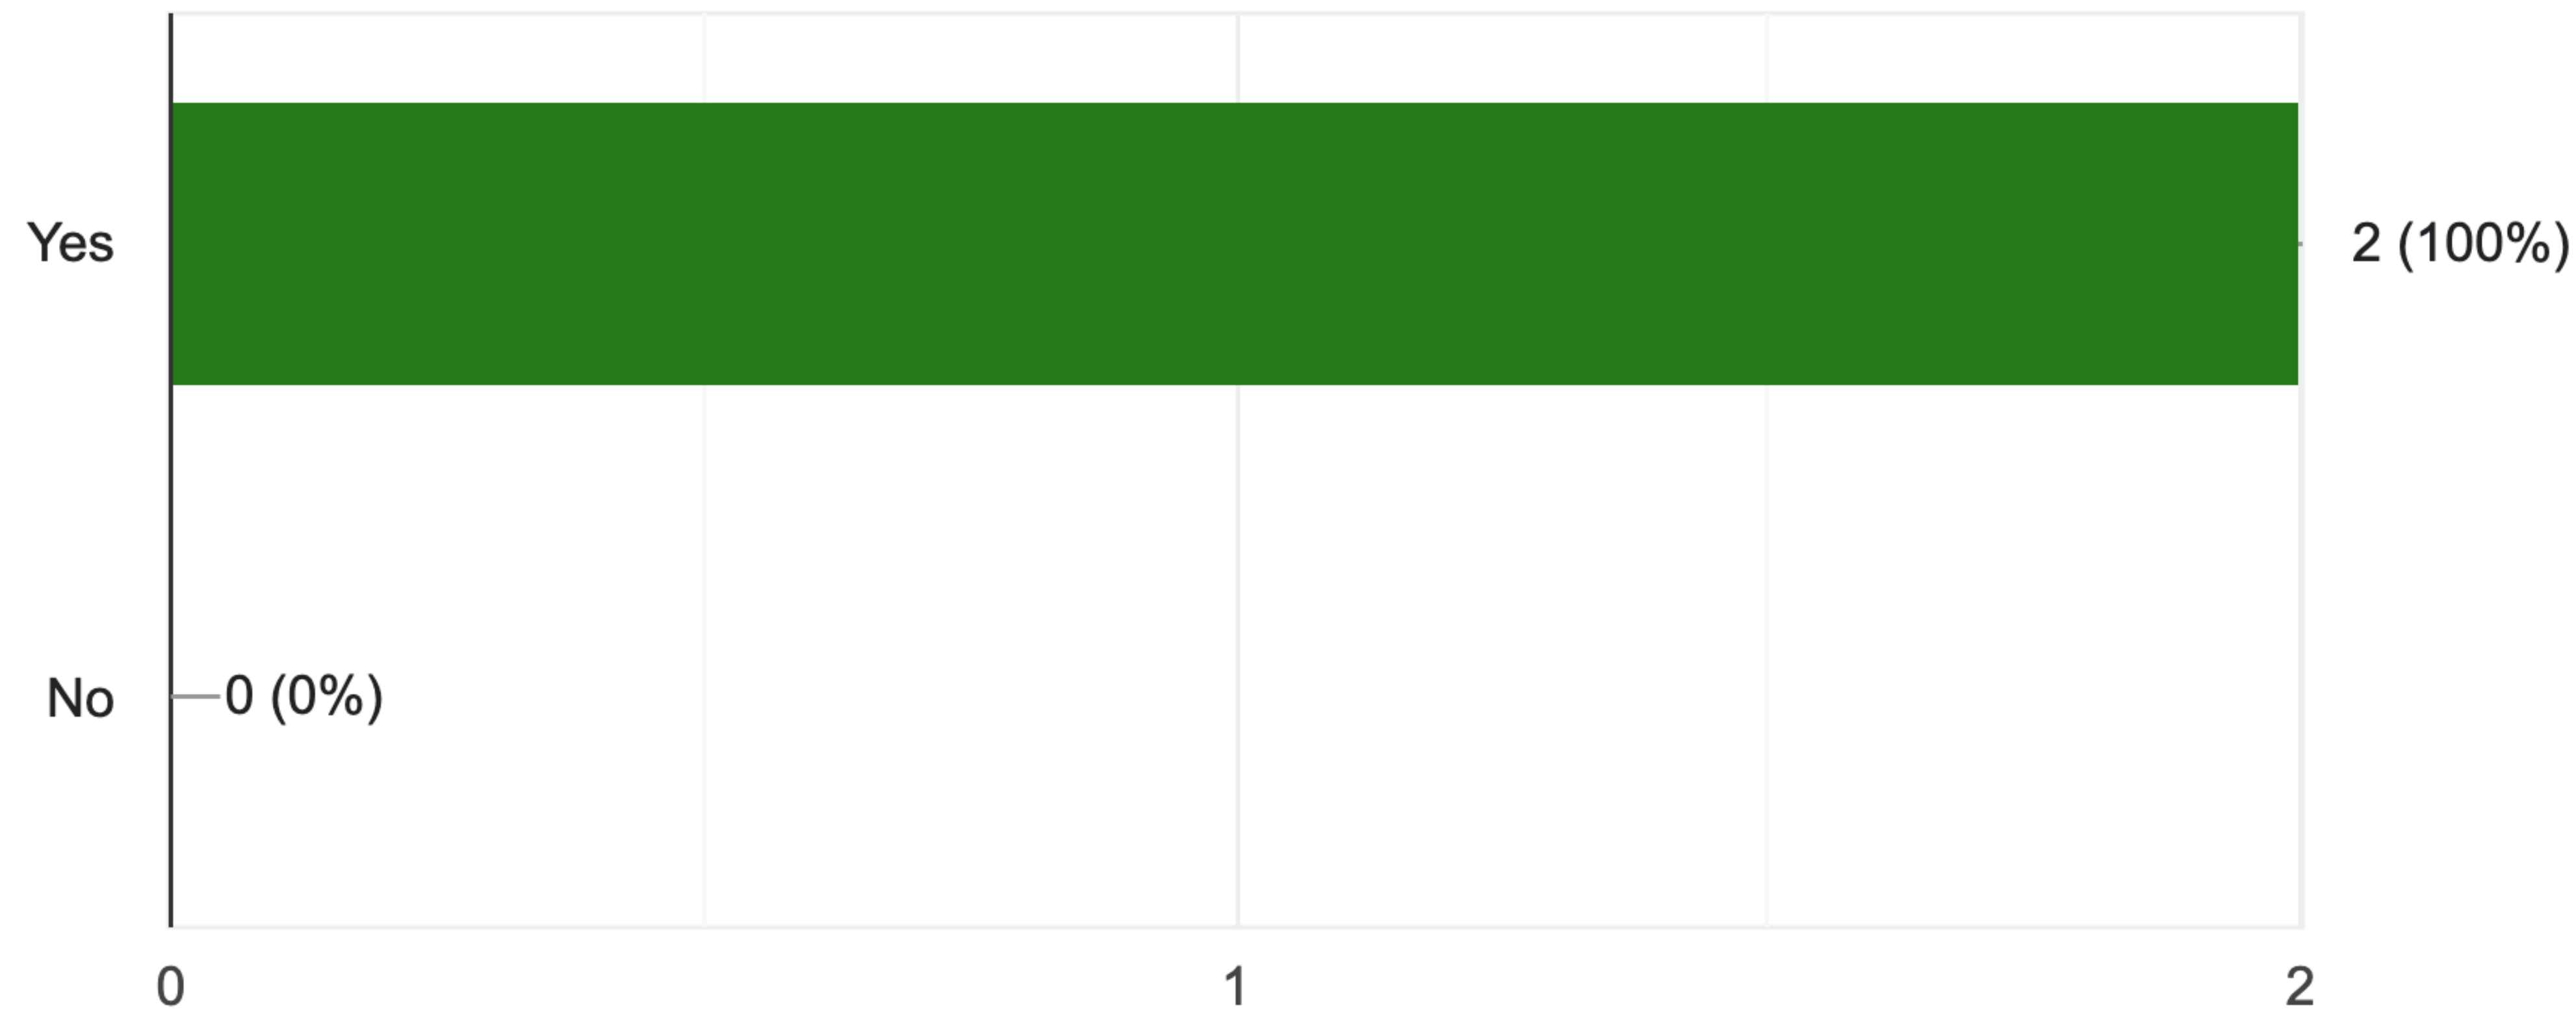

4 responses

- Cost
- Side effects
- cost, access, support and need prescription which also costs
- adverse effect and cost

Phentermine/topiramate

Is the supply of phentermine/topiramate stable in your country?

2 responses

What is the usual cost of phentermine/topiramate 7.5/46 mg once a day for 28 days in USD?

2 responses

- 70
- 150

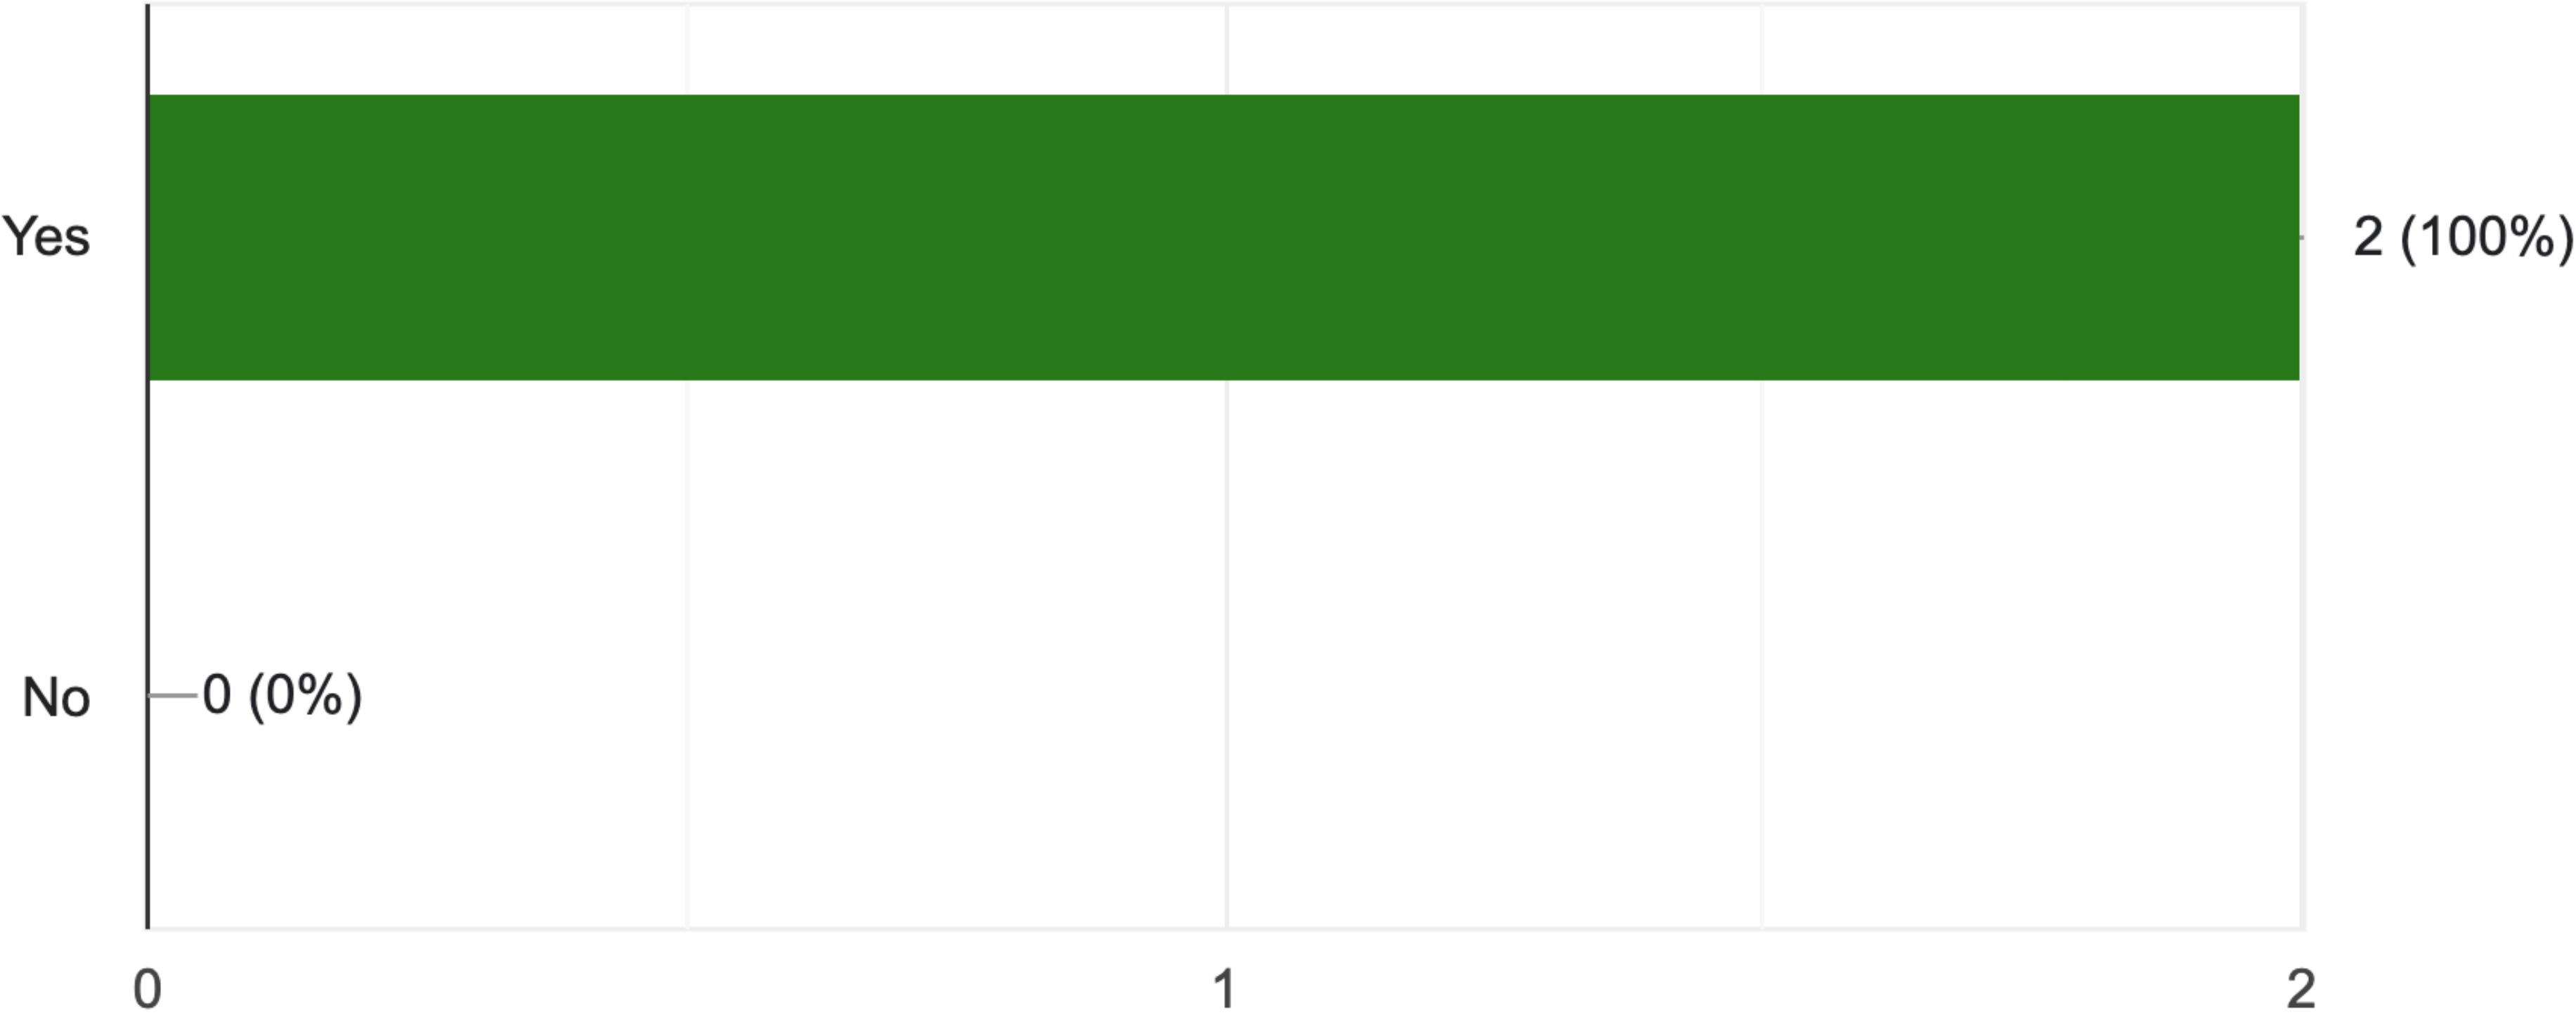

What is the usual cost of phentermine/topiramate 15/92 mg once a day for 28 days in USD?

2 responses

- 100
- 150

Do you think that people with obesity feel barriers to using phentermine/topiramate for their treatment?

2 responses

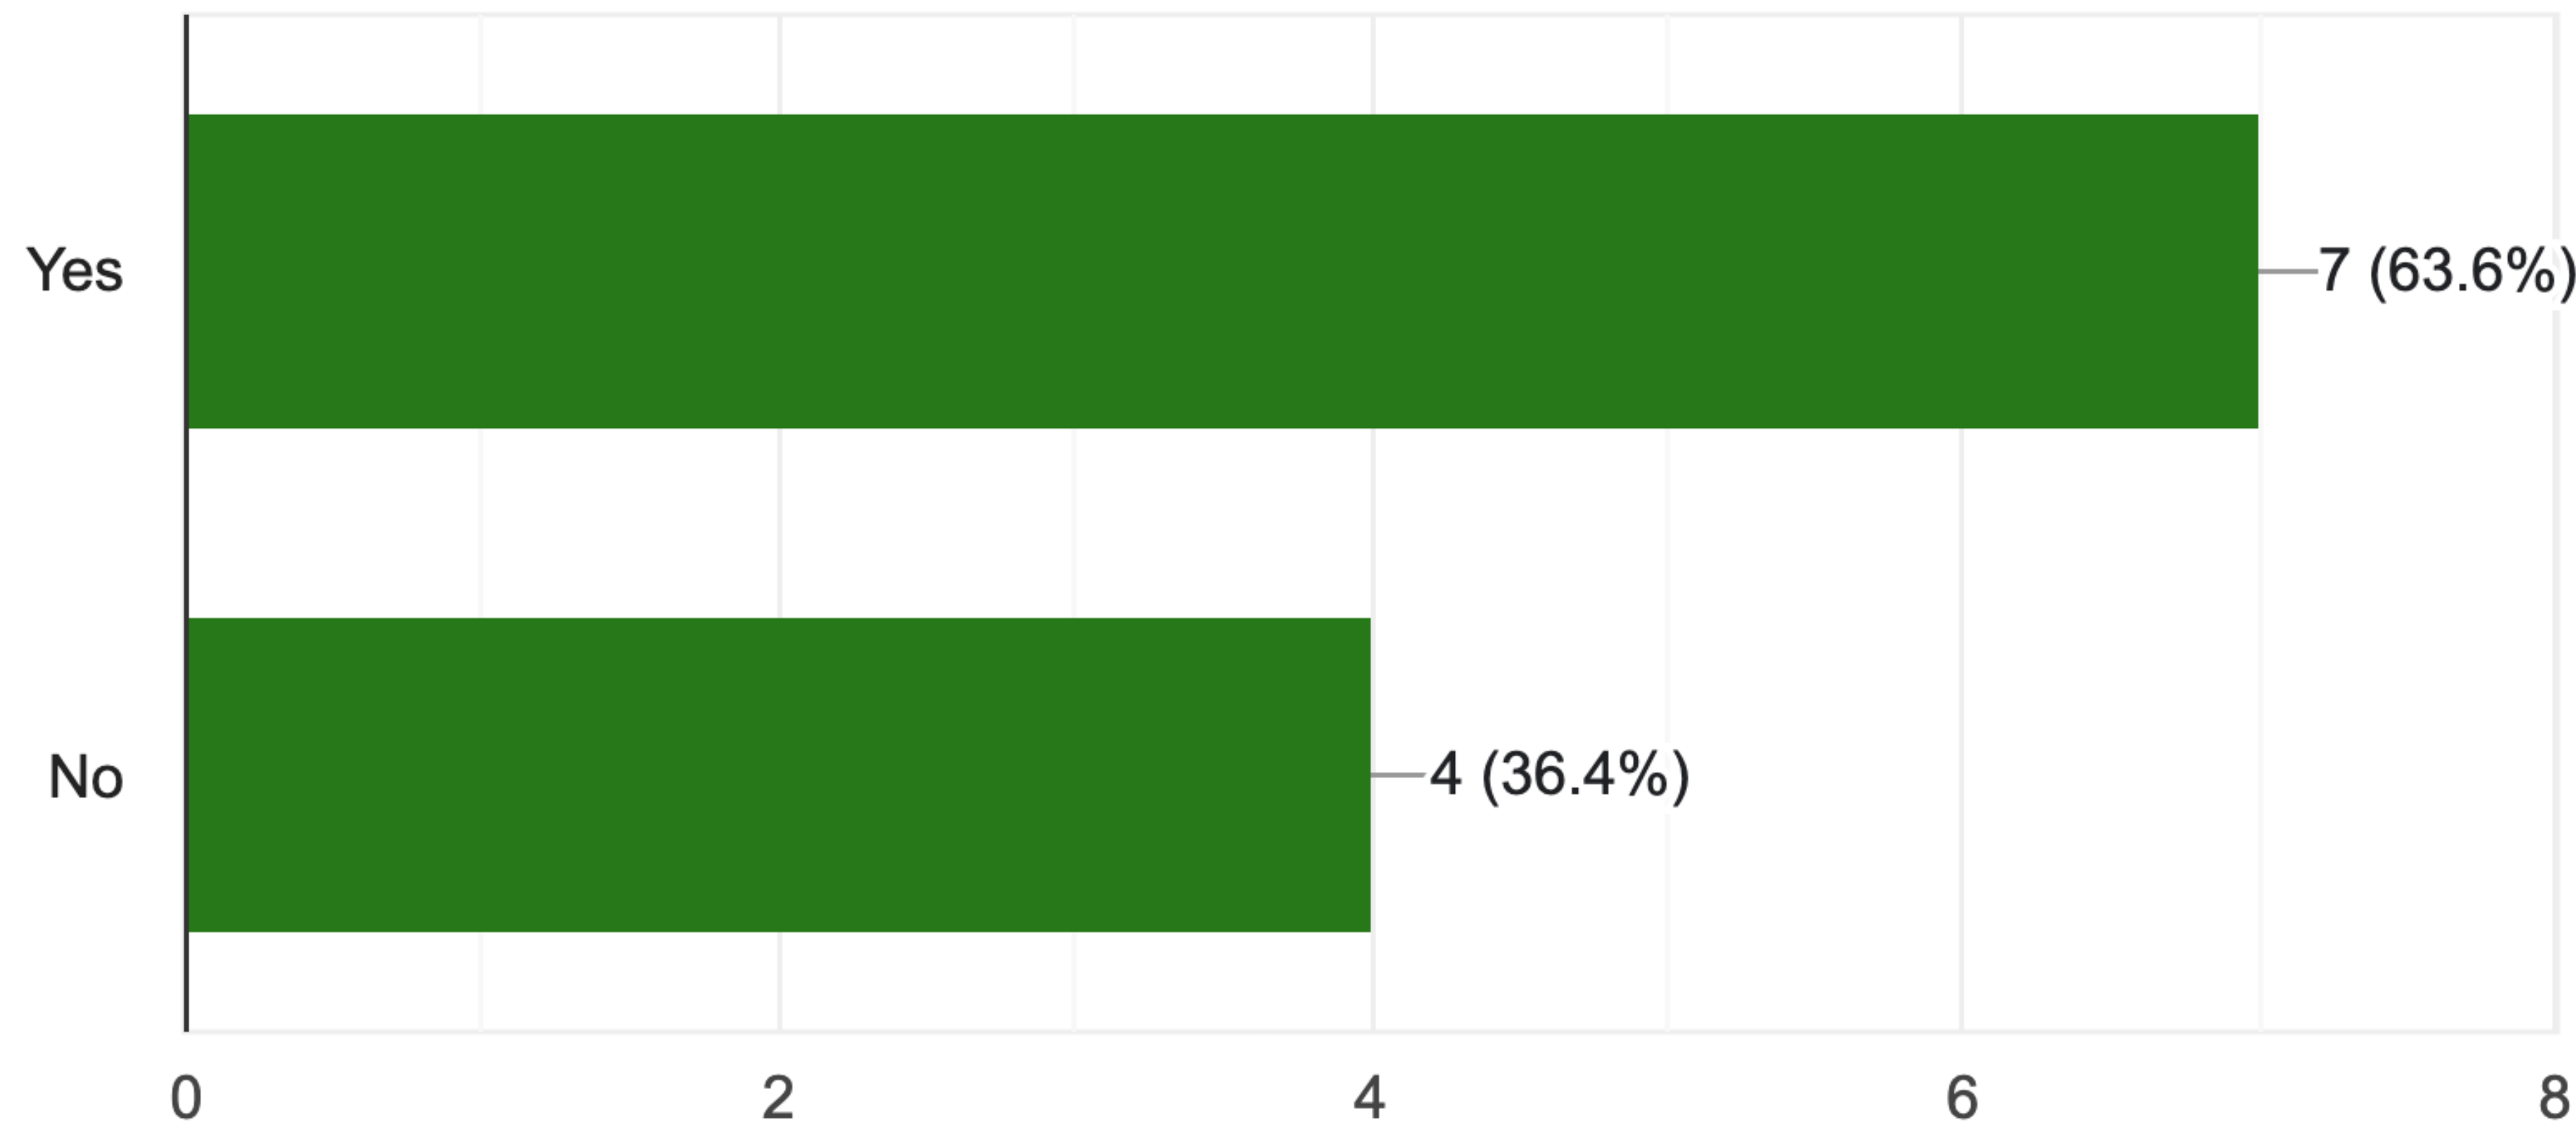

If so, what are the barriers? (1 response)

- cost

Liraglutide

Is the supply of liraglutide stable in your country?

11 responses

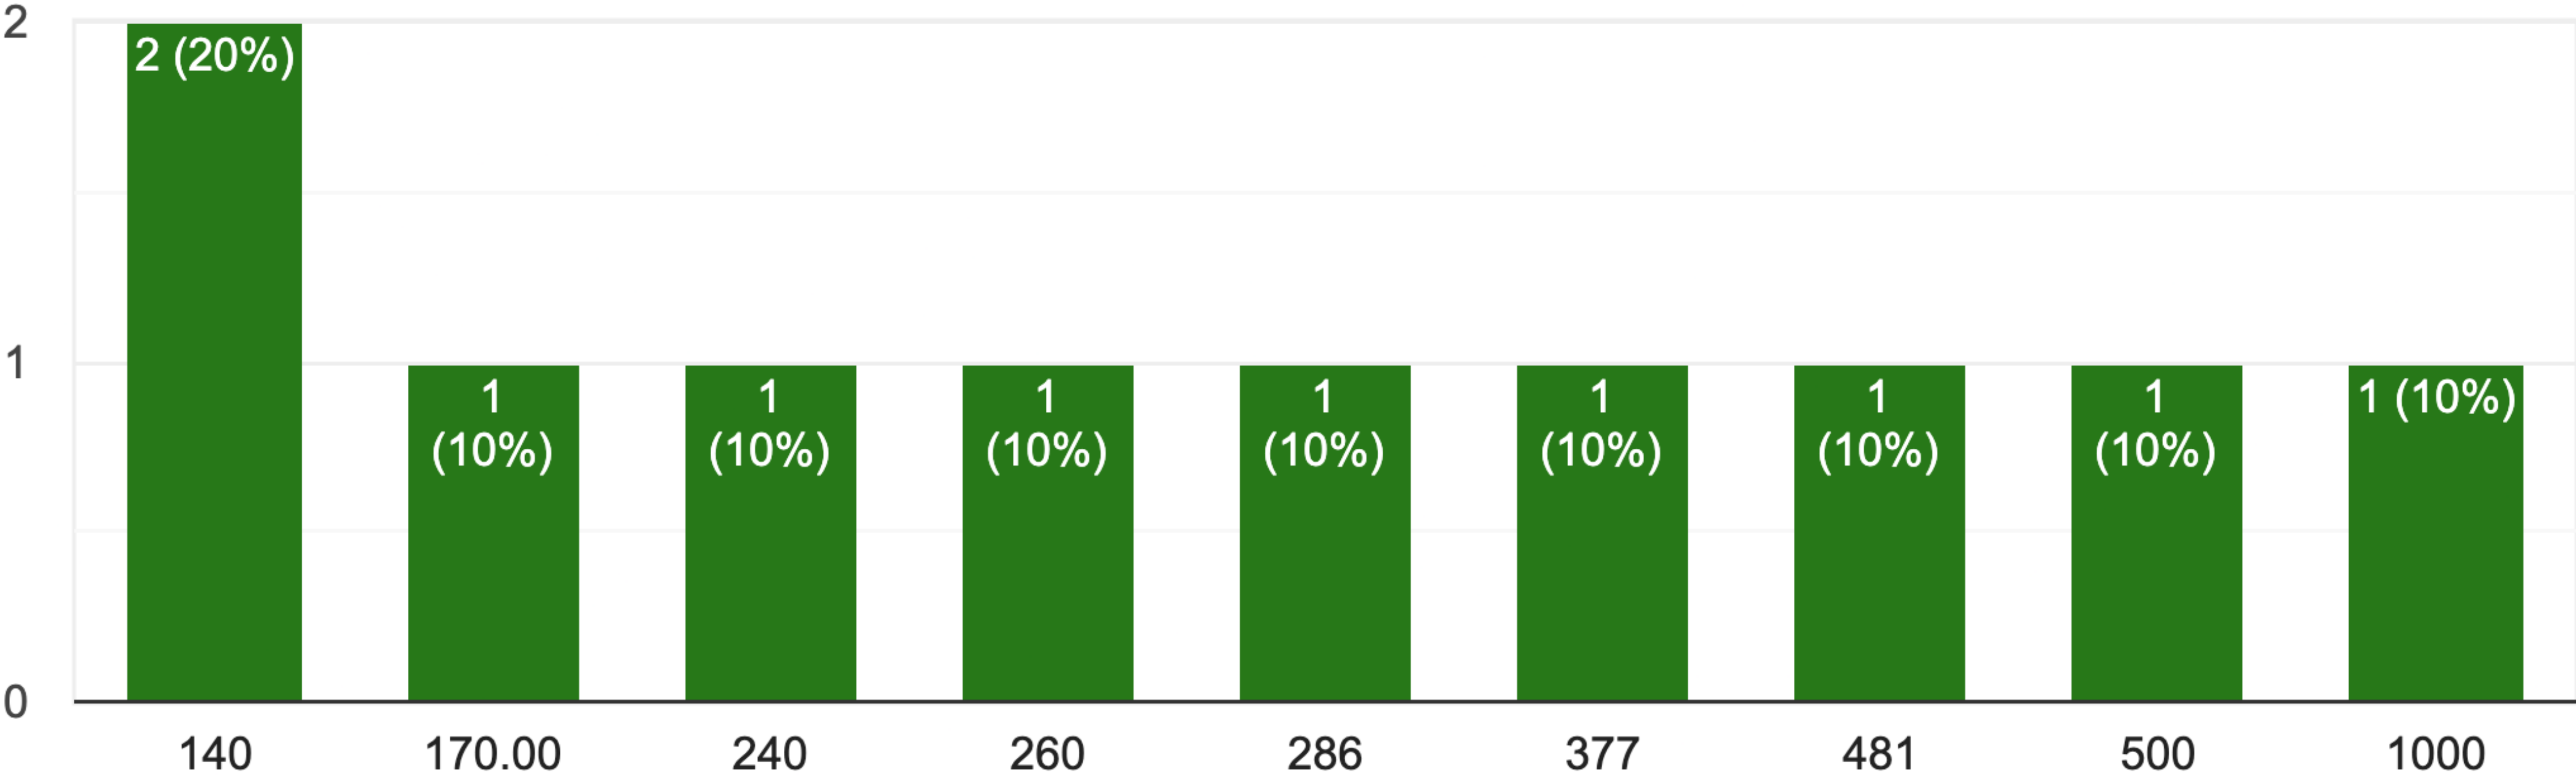

What is the usual cost of liraglutide 1.8 mg once a day for 28 days in USD?

10 responses

- 200
- 400
- 120
- 135.5
- not approved for obesity
- 170.00
- 5 pens saxenda cost \$377
- 300
- 289
- 170

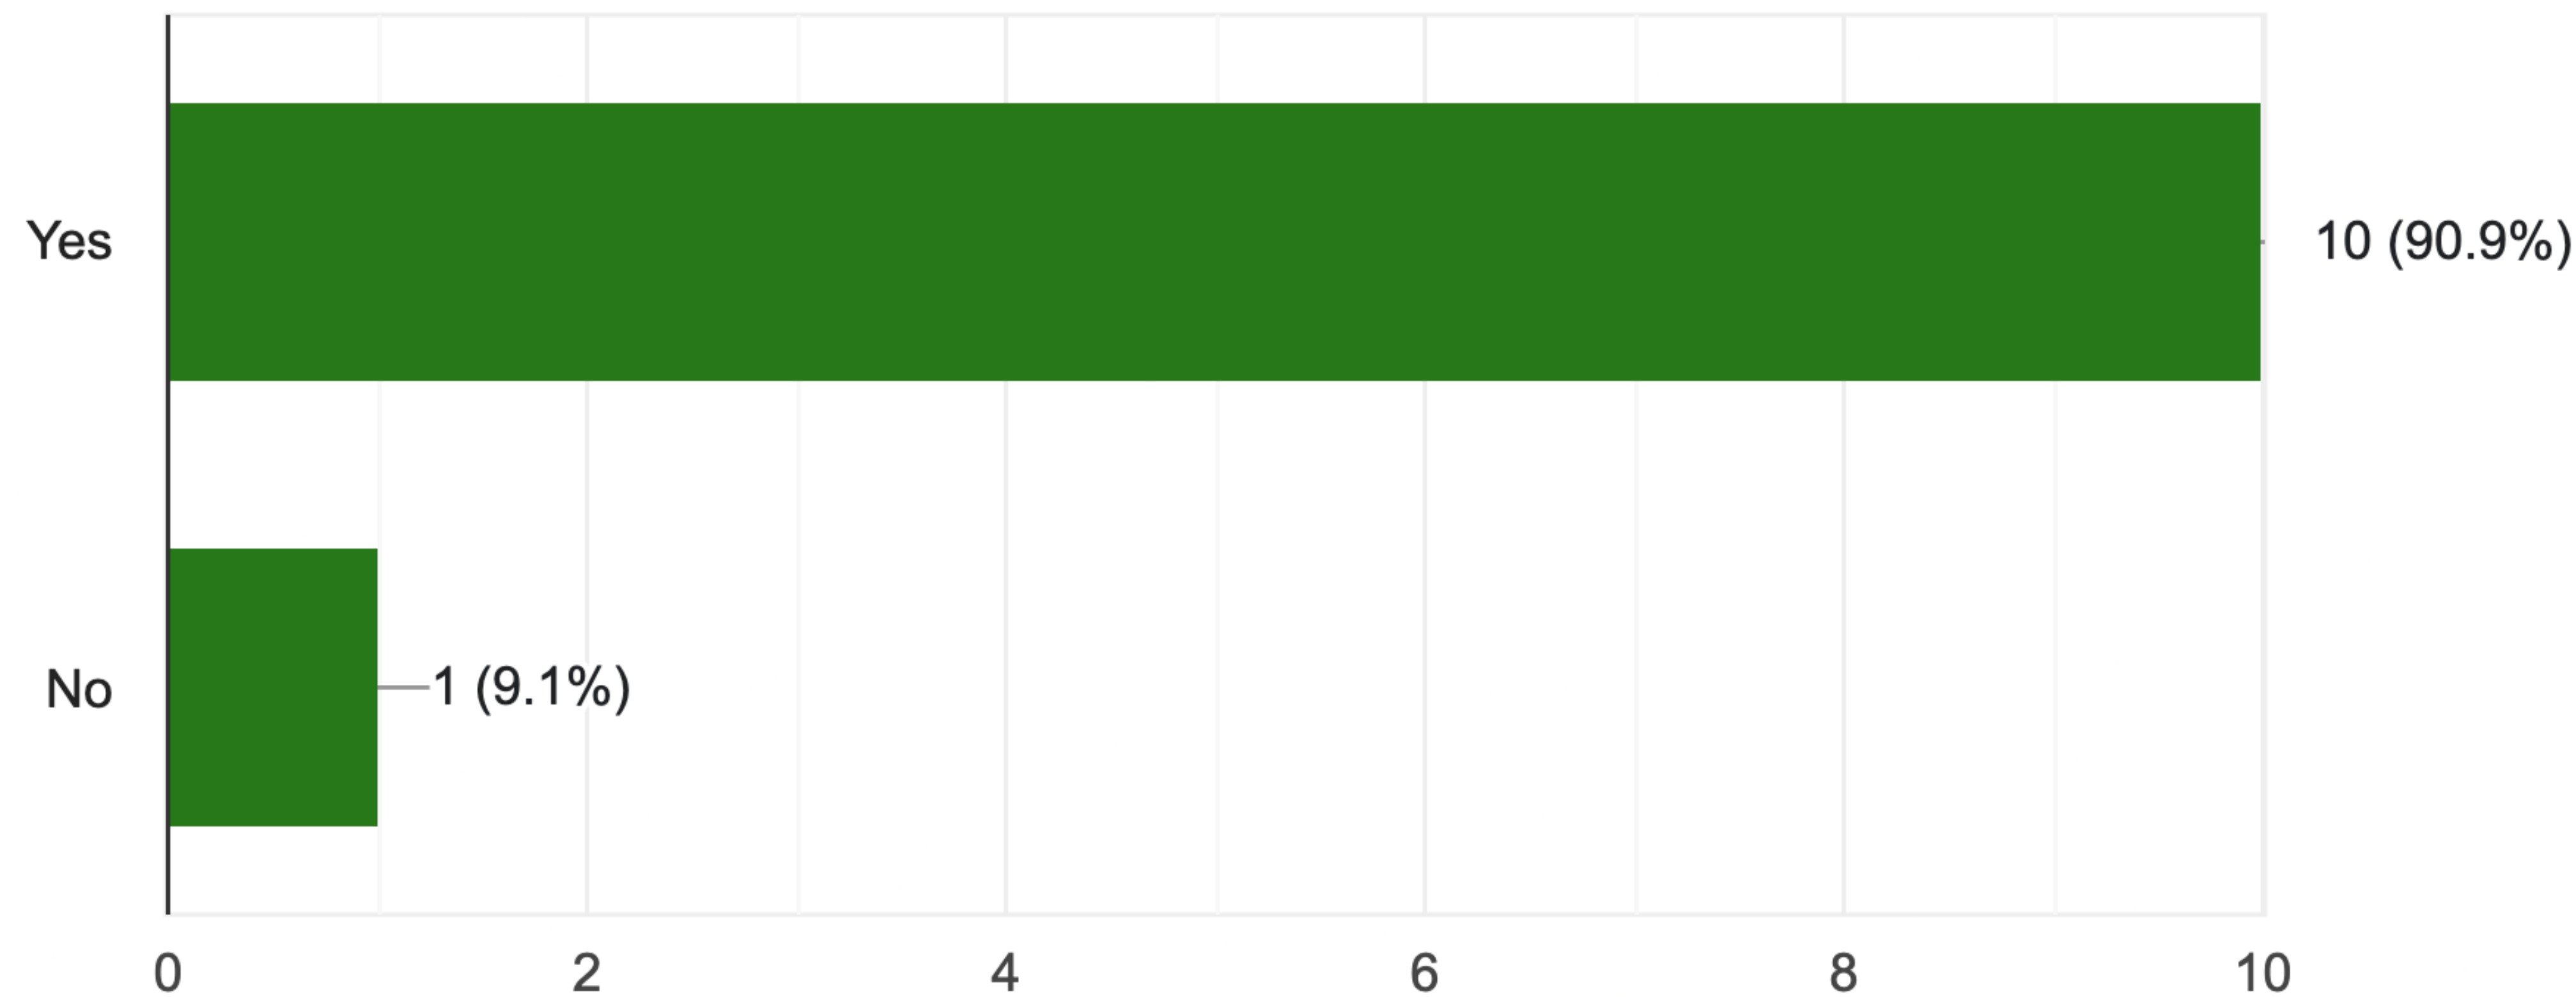

What is the usual cost of liraglutide 3.0 mg once a day for 28 days in USD?

10 responses

Do you think that people with obesity feel barriers to using liraglutide for their treatment?

11 responses

If so, what are the barriers?

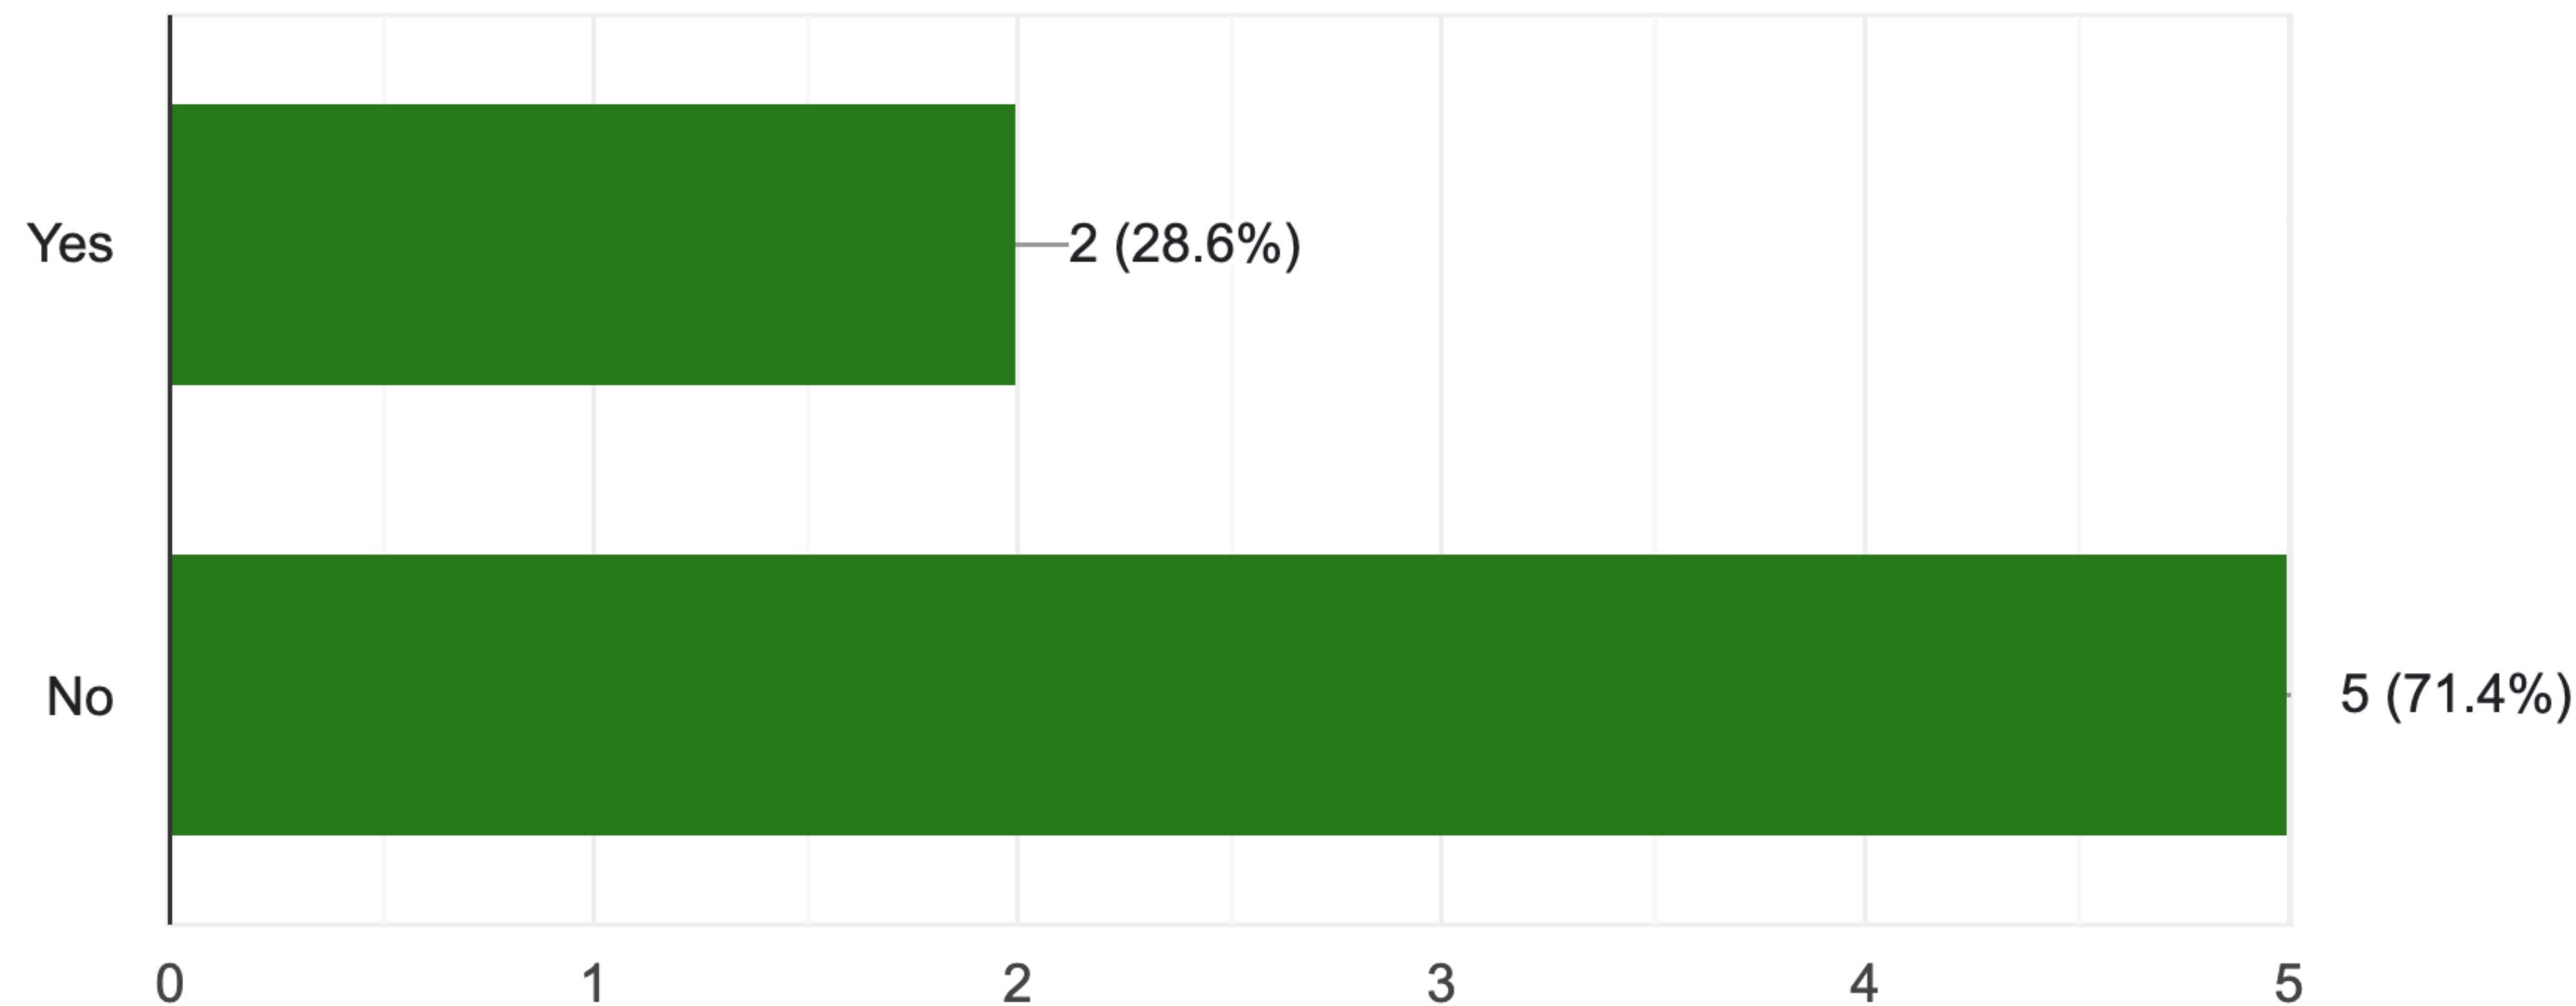

11 responses

- Stigma
- Cost, need for daily injection
- Not approved as Anti obesity medicine
- Need to inject and nausea
- not approved
- Cost
- cost, need prescription
- Cost and the need for daily injections
- cost and route of medication
- QD injection==> too frequent
- The cost; afraid of injection

Semaglutide

Is the supply of semaglutide stable in your country?

7 responses

What is the usual cost of semaglutide injection 1 mg (Ozempic) once a week for 28 days in USD? (6 responses)

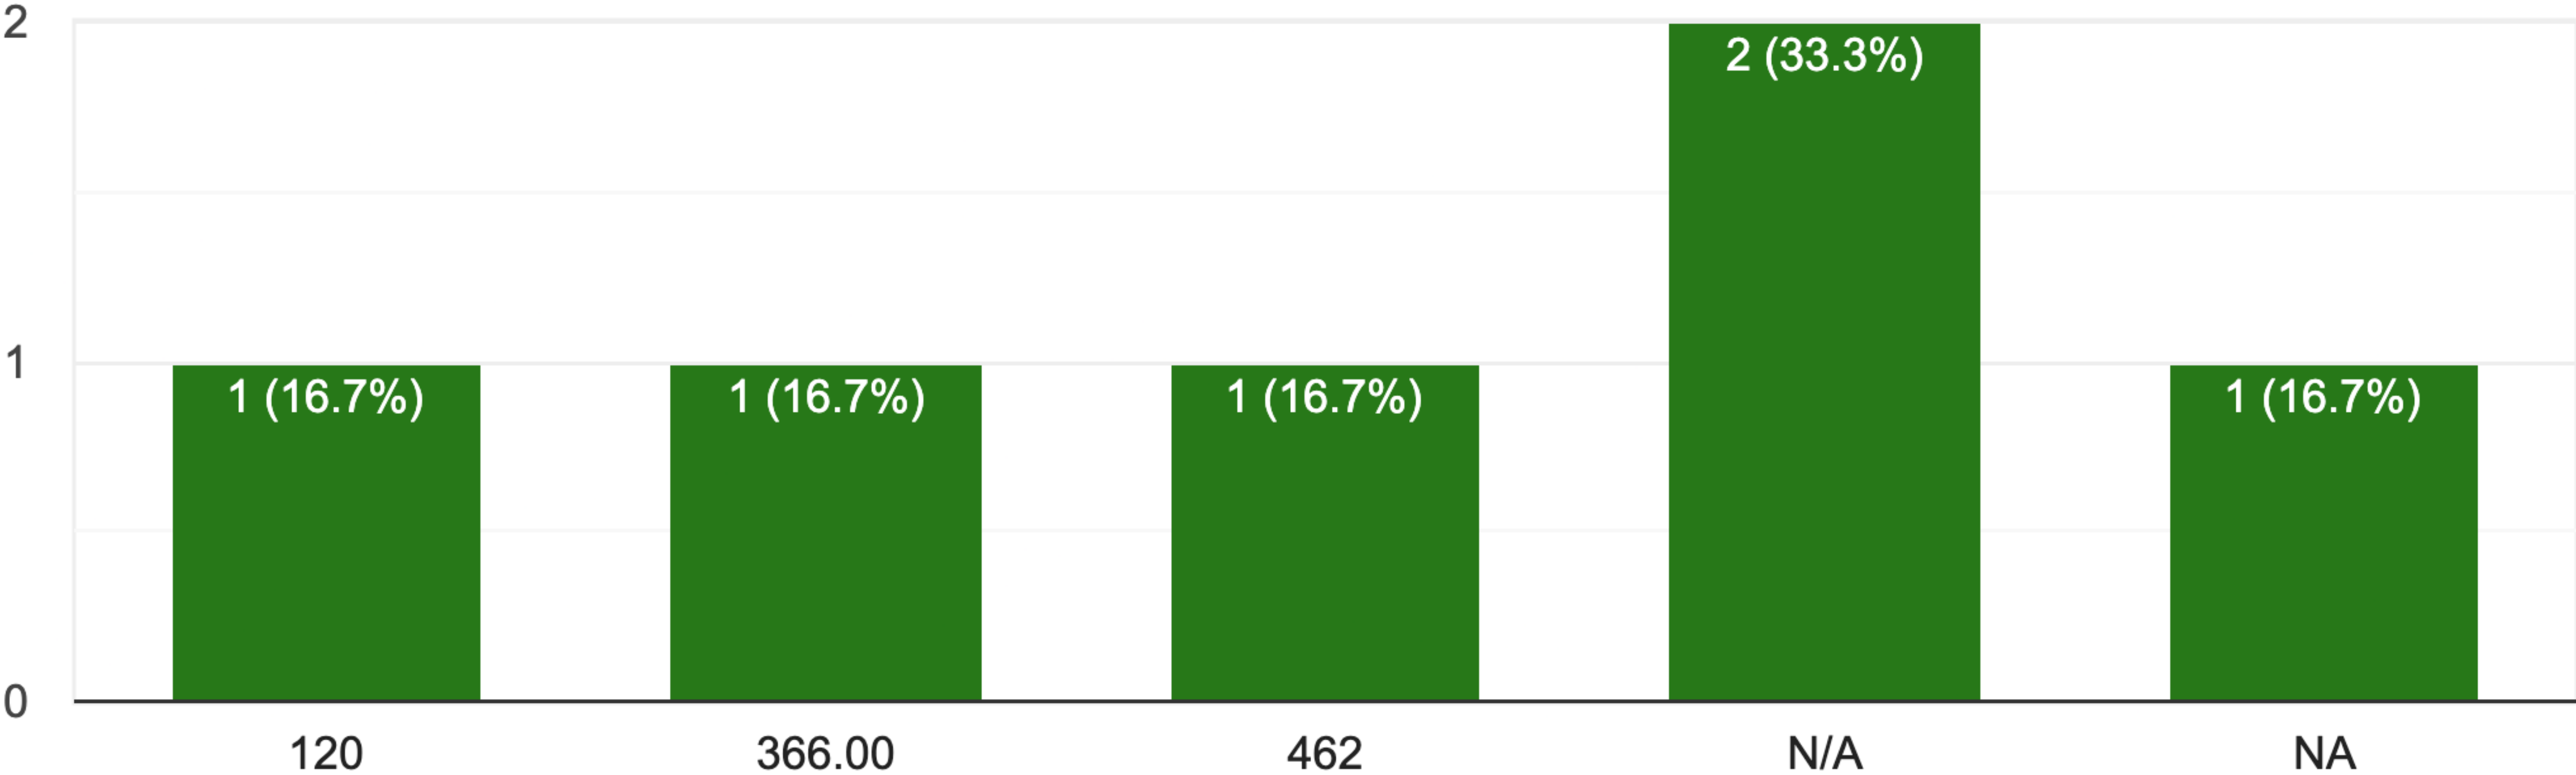

- 180
- 300
- 40USD and 70% reimbursed
- 366.00
- 140
- 125

What is the usual cost of semaglutide injection 2.4 mg (Wegovy) once a week for 28 days in USD? (4 responses)

- 320
- 600
- 292 USD and 70% reimbursed
- NA

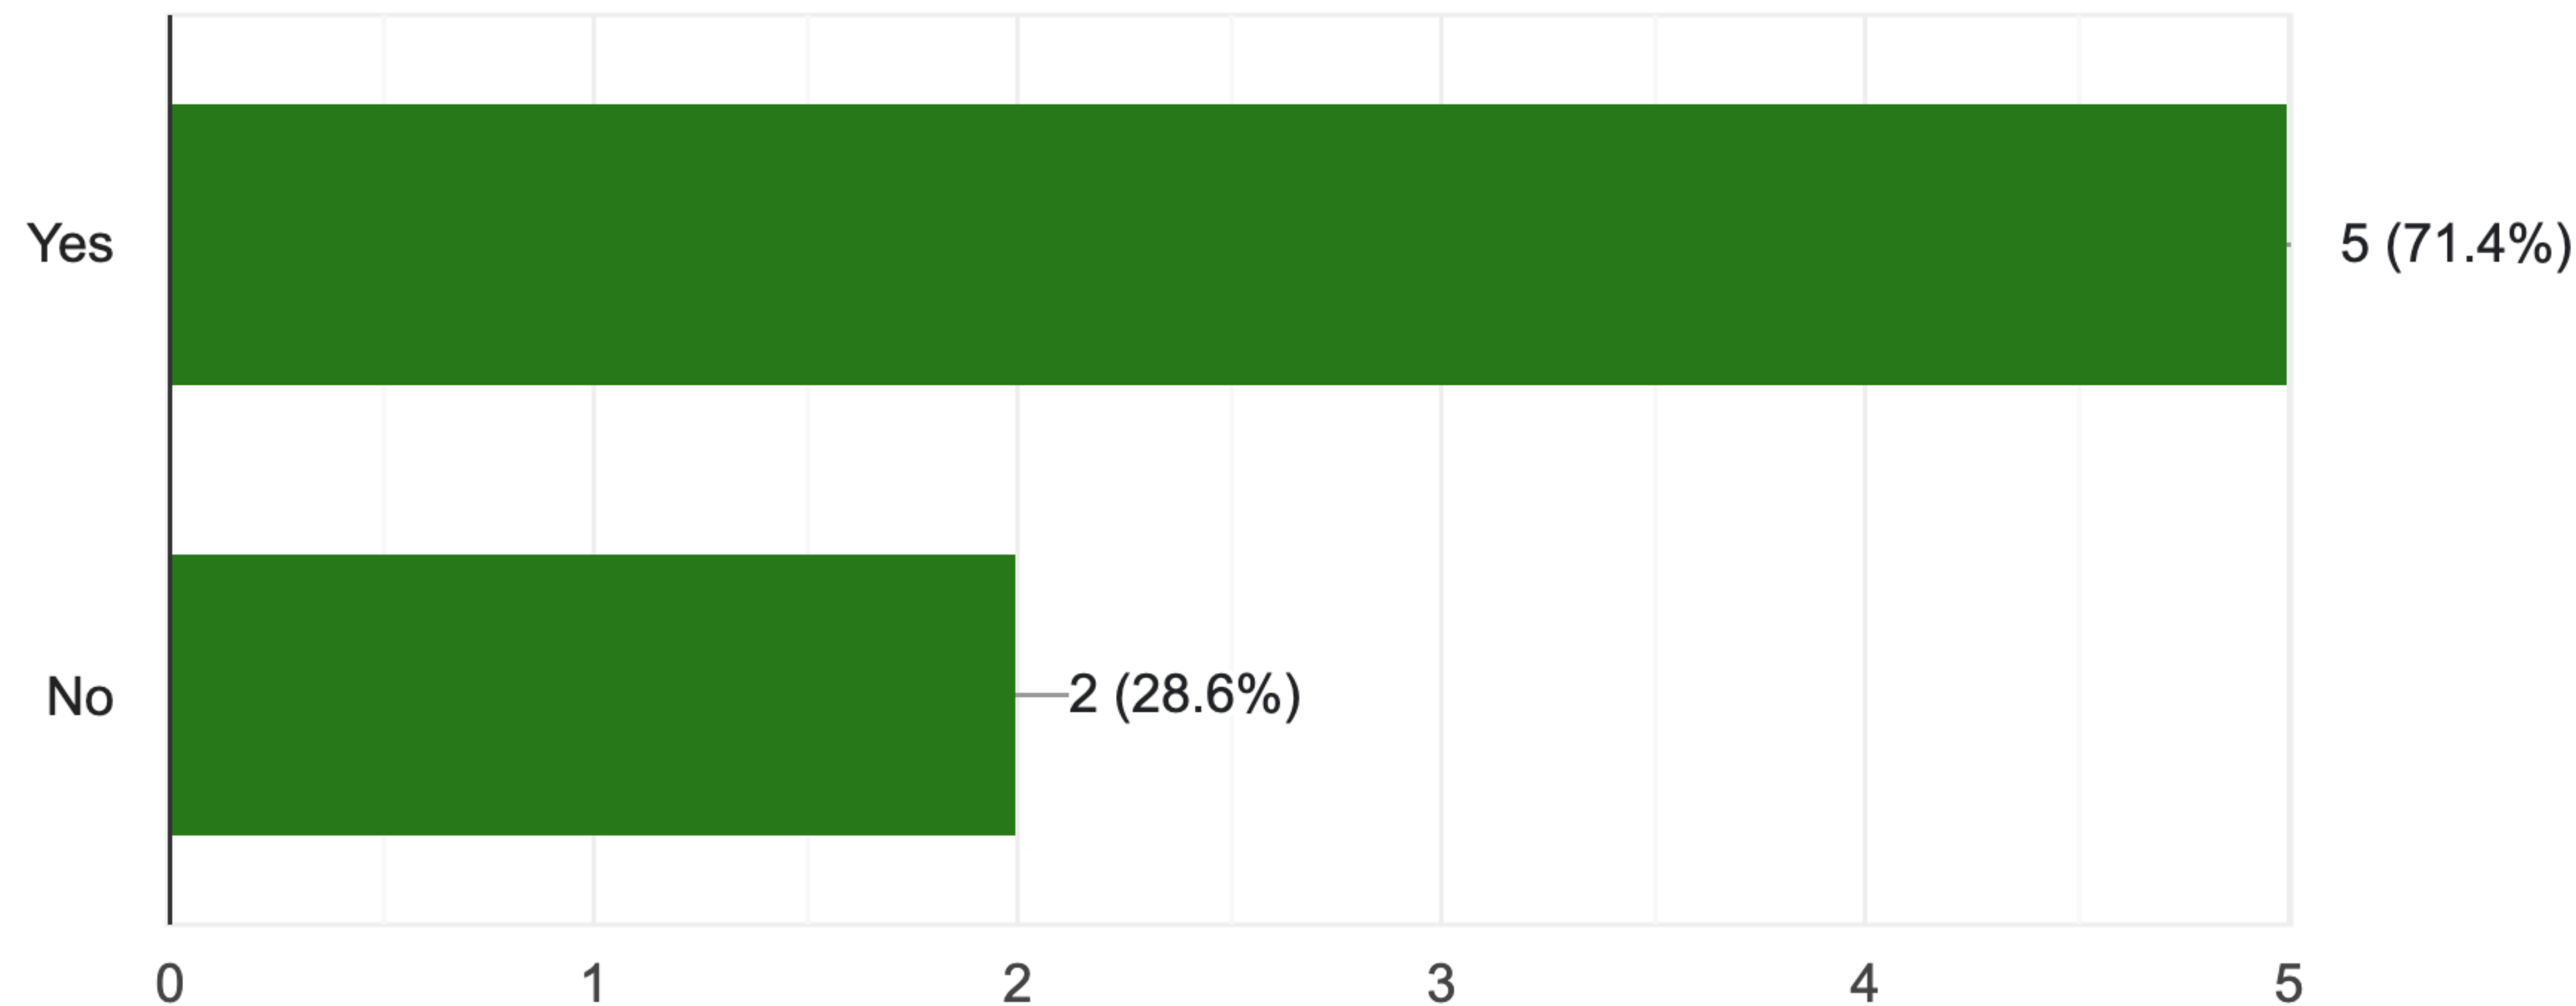

What is the usual cost of oral semaglutide 14 mg (Rybelsus) once a day for 28 days in USD?

6 responses

Do you think that people with obesity feel barriers to using semaglutide for their treatment?

7 responses

If so, what are the barriers?

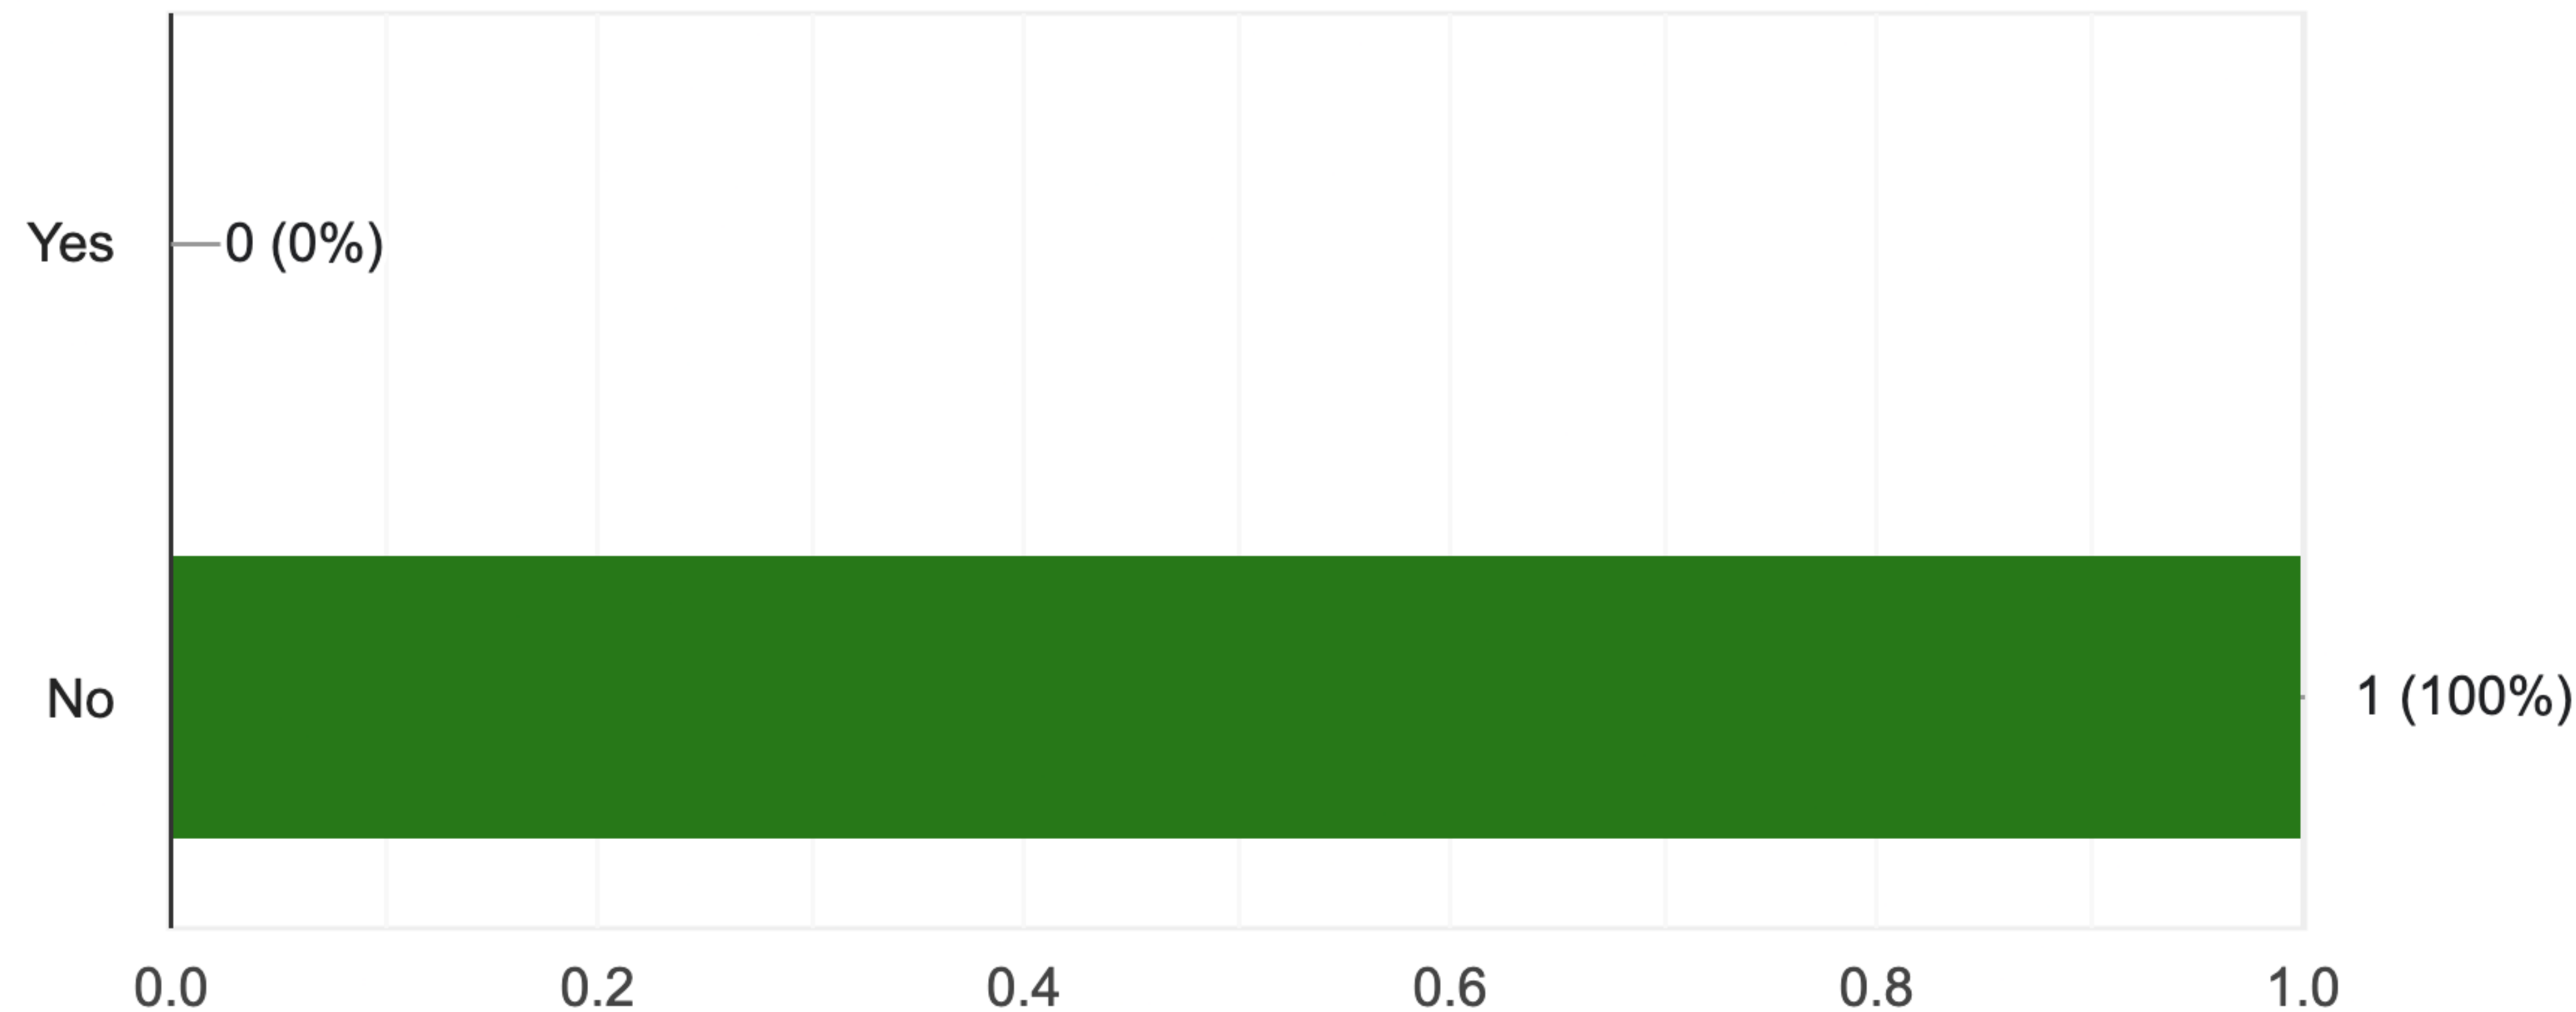

5 responses

- on PBS for diabetes \$33/month, same dose of Wegovy costs more than Ozempic
- Cost, fear of injection
- Cost; side effects
- Cost and availability
- Cost

Tirzepatide

Is the supply of tirzepatide stable in your country?

1 response

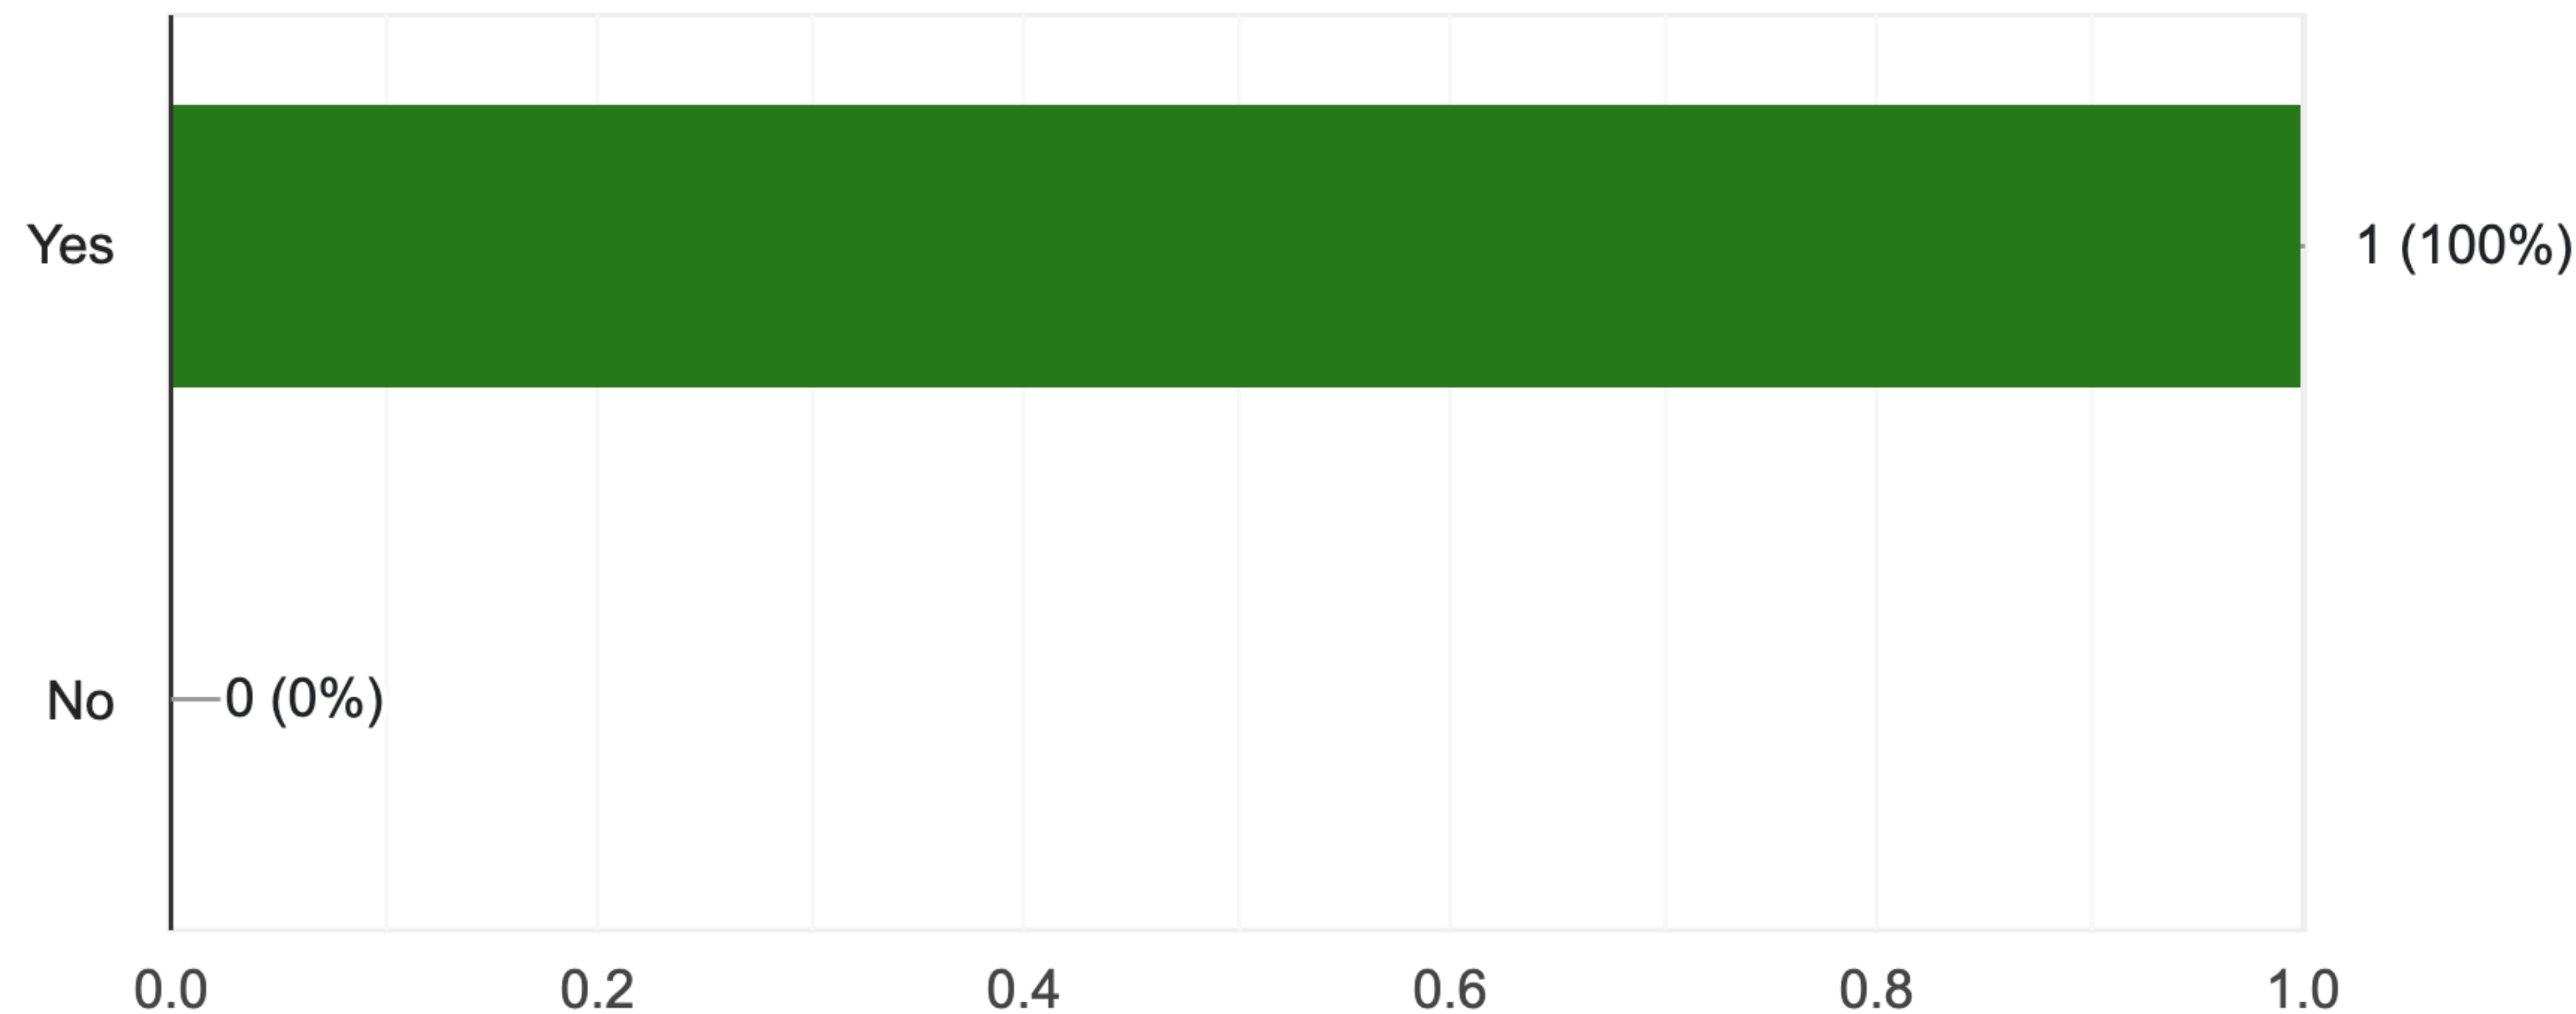

What is the usual cost of tirzepatide 15 mg once a week for 28 days in USD? (1 response)

- 270

Do you think that people with obesity feel barriers to using tirzepatide for their treatment?

1 response

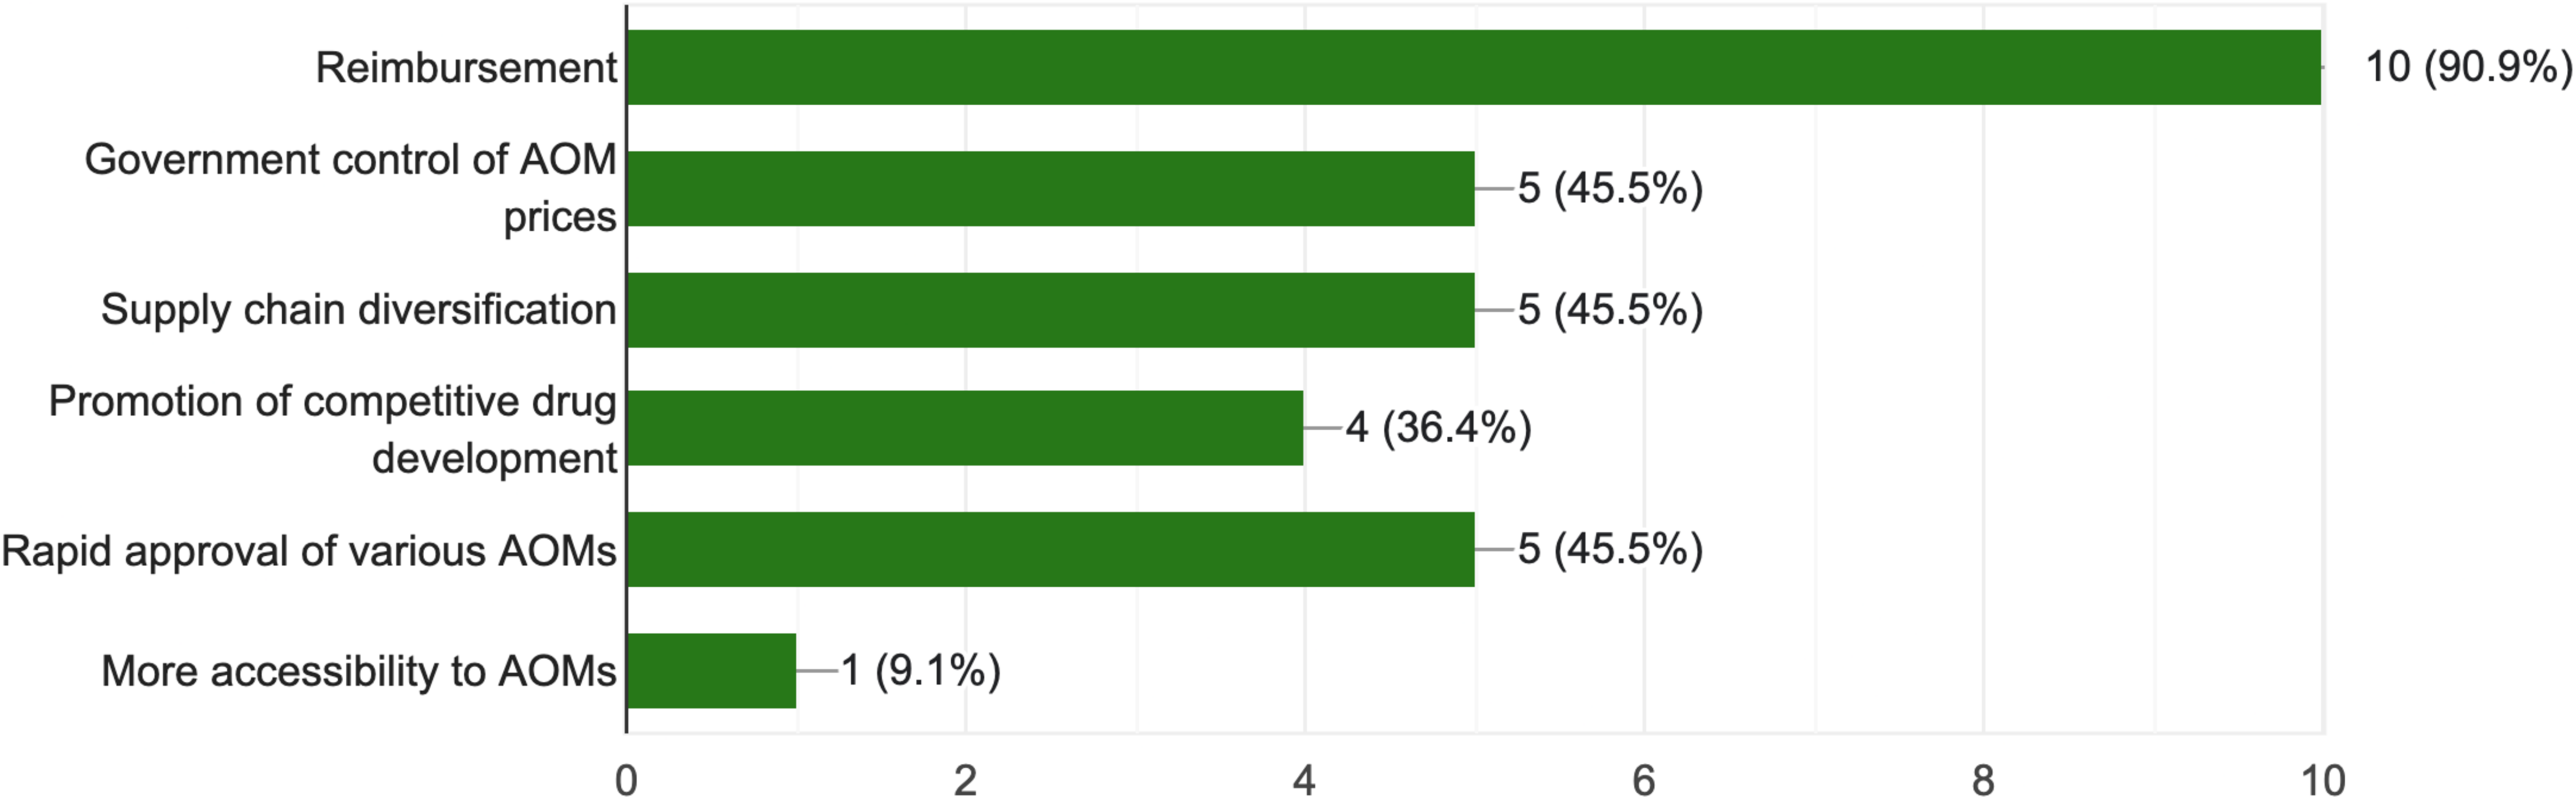

If so, what are the barriers? (1 response)

- Stigma

Policy

Which policies are important for improving access to AOMs for people with obesity? (Select all that you think are valid.)

11 responses

What do you think AOASO should do to improve access to AOMs for people with obesity?

10 responses

- Reduce stigma, petition pharma and governments for subsidies, improve primary care training, increased funding and access to MTD teams for people with severe and complex obesity
 - Work with insurance companies to improve reimbursement for obesity treatment
 - Make it available in our country
 - AOMs recommendation to use
 - communicate and share information between countries
 - AOASO to effectively advocate for the use of AOMs among specific national groups by influencing policymakers.
 - Help lobby to get costs and availability reduced
 - Ensure stable supply
 - reimbursement and treatment model for obesity control
 - Organize conferences to provide evidence of the effectiveness of AOMs
- Mobilize pharmaceutical companies to have price support programs
- Communicate - advocate the national health decision makers
- raise awareness of the community and health workers
